Foreword

The Summary Statistics report describes police services and crime trends in British Columbia. It is published every year by the Ministry of Public Safety and Solicitor General. This edition covers the ten-year period from 1994 to 2003, with an emphasis on 2003.

The report summarizes the structure of policing, the type and incidence of criminal activity, the number and distribution of police personnel throughout the province, and the cost of police services. The appendices contain detailed data for individual policing jurisdictions, as well as for the province.

There may be some variance in the data and statistics in this edition of the Summary Statistics report in comparison to previous editions. Where this occurs, the latest edition will reflect the most current data.

Overview of Police Structure in British Columbia

Residents of British Columbia receive police services from an RCMP provincial force, 59 RCMP municipal forces, 11 independent municipal forces, and three First Nations forces (FNAPS). In addition, the RCMP federal force, the Combined Forces Special Enforcement Unit (formerly known as Organized Crime Agency of British Columbia), and the Canadian National and Canadian Pacific railway police forces also provide law enforcement within the province.

Municipalities with a population exceeding 5,000 persons are responsible for providing police services within their boundaries. These municipalities may contract with the RCMP to provide municipal policing or they may form an independent (non-RCMP) municipal force. The RCMP provincial force polices municipalities with a population below 5,000 persons, as well as unincorporated (usually rural) areas.

Provincial and municipal RCMP detachments provide police services to specific geographic locations within the province as do the independent municipal forces and the First Nations forces. Either a municipal, provincial or a First Nations force polices each area in the province. A complete list of municipal, provincial and First Nations policing jurisdictions is provided at the end of this section.

RCMP Provincial Force

The RCMP provincial force serves unincorporated areas as well as 84 municipalities with populations below 5,000 persons. In 2003, the provincial force had an authorized strength of 1,708 officers providing police services to a population of 688,271 persons.

The cost of the provincial force is shared between the federal and provincial governments under the terms of the Provincial Police Services Agreement. The province pays 70% of the contract costs while the federal government pays the remaining 30%. Municipalities with a population of less than 5,000 do not make a direct contribution toward the provincial police services they receive. However, the rural property tax collected by the province from residents in the unincorporated areas serves to offset, to some degree, the cost of policing rural areas.

The RCMP provincial force detachments are usually named after the municipalities in which the detachment offices are located. For example, the Princeton RCMP provincial unit polices not only the

Town of Princeton but also the rural areas and other communities contained within the detachment's boundaries.

The RCMP provincial force is also responsible for policing unincorporated areas surrounding municipalities that have populations exceeding 5,000 persons. For example, the Nanaimo RCMP provincial unit is only responsible for policing areas outside the municipal boundaries of the City of Nanaimo since the City is served by a municipal RCMP force.

Where both municipal and provincial units are located in the same detachment, the RCMP members from each unit report to one commanding officer and provide police services to the combined provincial and municipal policing areas.

Municipal Police Forces

Under the Police Act and the Local Government Act a municipality must assume responsibility for its police services when, as a result of a Canada Census, its population reaches 5,000 persons. In 1996, there were 67 municipalities with populations exceeding 5,000 persons. This number increased to 71 in 1997 following the release of the 1996 Canada Census results, and remained at 71 following the release of the 2001 Canada Census results.

As previously mentioned, these municipalities may form their own independent police forces or contract with the RCMP for municipal policing services. As discussed below, 12 municipalities have their own police departments, while 59 contract with the RCMP for municipal police services.

Independent Municipal Forces

Twelve municipalities in British Columbia have formed their own police departments. These twelve municipalities are policed by 11 independent municipal police departments. Following the amalgamation of the Victoria and Esquimalt police departments in 2003, these two municipalities are policed by one independent force, the Victoria Police Department.

The 11 police departments are referred to as independent municipal police forces, since each of the municipalities is responsible for 100% of its policing costs. The independent municipal forces include Vancouver, Victoria, Saanich, Central Saanich, Oak Bay, Delta, Abbotsford, New Westminster, West Vancouver, Nelson and Port Moody.

RCMP Municipal Forces

In 2003, there were 59 municipalities with RCMP municipal police services. Each of these municipalities has signed a Municipal Police Unit Agreement with the federal and provincial governments for the provision of RCMP police services to the area within their municipal boundaries. Under this agreement (contract), the cost of policing these municipalities is shared between the municipality and the federal government.

There are two different cost-sharing formulas. Municipalities with populations exceeding 15,000 persons are responsible for 90% of the cost of their RCMP police services. Municipalities with populations between 5,000 and 15,000 persons are responsible for 70% of the cost of their RCMP police services. The federal government pays the remaining 10% and 30% respectively. However, municipalities with RCMP agreements pay 100% of their accommodation and support staff.

Chronology of New RCMP Municipal Forces (1986–2002)

During the 1980s, eight B.C. municipalities exceeded 5,000 population and became responsible for their police services. Rather than establish their own police departments, or contract for municipal police services, it was agreed that the province, through the RCMP provincial force, would extend police services to these municipalities on a fee-for-service basis. In 1992, seven of these “extended” municipalities — Revelstoke, Coldstream, Pitt Meadows, Colwood, North Saanich, Parksville (Oceanside) and Port Hardy — converted to RCMP municipal contracts. The eighth municipality, Fernie, converted in 1994.

The results of the 1991 Canada Census revealed that the population of three municipalities — Sechelt, View Royal and Smithers — had exceeded 5,000 persons. Consequently, these municipalities became responsible for their police services in 1992. Two of the municipalities signed RCMP municipal contracts in 1992 and the third, Smithers, signed a municipal contract in 1994.

In 1993, Qualicum Beach expanded its municipal boundaries and its subsequent population exceeded 5,000 persons. Qualicum Beach entered into a contract for RCMP municipal police services during that year.

In 1994, Langford became incorporated as a municipality with a population exceeding 5,000 and signed a RCMP municipal police services contract.

Overall, between 1992 (when seven of eight extended contracts were converted to municipal contracts) and 1994 (when an eighth extended contract was converted and Langford was incorporated as a municipality) the number of RCMP municipal police contracts rose from 43 to 56.

Between 1995 and 1997, the number of RCMP municipal contracts decreased by two contracts to 54. In 1995, Abbotsford (RCMP municipal force) and Matsqui municipalities amalgamated forming the Municipality of Abbotsford with an independent municipal force. In 1997, Fernie, as a result of the 1996 Canada Census, reverted from an RCMP municipal force to a provincial force jurisdiction.

The results of the 1996 Canada Census resulted in five municipalities — Hope, Ladysmith, Lake Country, Spallumcheen and Whistler — becoming responsible for providing municipal police services. Consequently, the number of RCMP municipal contracts increased to 59.

In 2002, as a result of the 2001 Canada Census, the municipality of Sooke, with a population exceeding 5,000, entered into a contract for RCMP municipal police services while the municipality of Port Hardy, with a population of less than 5,000, reverted from an RCMP municipal force to a solely provincial force jurisdiction.

First Nations Policing

The First Nations Policing Policy, announced in June of 1991 by the federal government, gives First Nations communities the opportunity to participate with provincial and federal governments in the development of dedicated policing services within their communities. First Nations communities may choose to develop and administer their own policing service, or they may choose a police service delivered by First Nations RCMP officers working within the RCMP provincial force. The First Nations Policing Policy is designed to give First Nations communities greater control over the delivery and management of policing services within their communities.

First Nations Community Policing Services (FNCPS)

There are 42 RCMP officers working out of 24 RCMP detachments who are part of the First Nations Community Policing Services (FNCPS) and two RCMP officers are employed as Program Coordinators/Policy Analysts in Aboriginal Policing Services in Vancouver and Kamloops. These officers serve many

aboriginal communities. Each FNCPS unit is established under a tripartite agreement between the province, the federal government and the participating Band. The provincial share of funding the FNCPS is 48% while the federal share is 52%. The program represents an enhancement of the RCMP provincial police service.

Community Constable Program (ACCP)

In those communities where a tripartite agreement has not yet been signed, the RCMP continues to operate its Aboriginal Community Constable Program (ACCP). Under the ACCP, there are 30 First Nations officers who work out of 24 RCMP detachments and serve a number of aboriginal communities. The province pays 54% and the federal government pays 46% of this cost-shared program.

First Nations Administered Police Services (FNAPS)

There are three First Nations Administered Policing Services (FNAPS) in British Columbia. These include Stl'atl'imx Tribal Police, Kitasoo-Xaixais Public Safety Department and Ditidaht First Nation Public Safety and Policing Service. Each of these police services are modelled on the structure of an independent municipal police department, with governance provided by a police board whose members are selected from the communities served. Police officers recruited by the police boards are either experienced officers or graduates from the Police Academy of the Justice Institute of B.C. All officers are appointed under the Police Act.

Overview of Crime Data Collection in British Columbia

Every police department within British Columbia participates in the Uniform Crime Reporting (UCR) Survey. Managed nationally by the Canadian Centre for Justice Statistics (CCJS), the UCR Survey forms the basis of crime data collection within the province and across the country. The UCR Survey is designed to collect aggregate data on the incidence of crime. It records three major components for each criminal incident: the most serious offence (MSO) within the incident (by type and volume); clearance (by charge or by other means); and persons charged in connection with the offence (by gender and adult/youth).

Statistics Canada, in co-operation with the Canadian Association of Chiefs of Police, developed the UCR data collection system. Although some details of the UCR Survey have been modified since its implementation in 1962, the fundamental aspects of the UCR Survey have remained fairly constant since that time. This publication contains UCR data for the last ten years, 1993 to 2002.

In addition to the UCR Survey, the Ministry of Public Safety and Solicitor General receives more detailed data on specific crime categories such as homicide, sexual assault and spousal assault. These data are collected from three separate, but related, databases including the Operational Statistics Reporting (OSR) System, the UCRII database and the Homicide database.

The Uniform Crime Reporting (UCR) Survey

Provincially, UCR aggregate data are stored in the Police Management Information System (PMIS) maintained by Police Services Division (PSD). The PMIS contains data from 1977 onward. The data are updated monthly and quarterly.

Policing jurisdictions in B.C. perform periodic reviews or audits to ensure their crime data are recorded accurately. PSD also monitors this data to identify any discrepancies. As a result, the UCR data contained in this report are considered to accurately represent B.C.'s crime trends.

The collection, analysis and explanation of crime data can be complex due to the diverse ways in which the data can be examined. Different data collection systems produce different findings of the same series of events because the data reflect the definitions that are used and the manner in which information is gathered.

The UCR Survey records police-reported crime data. As such, UCR data contains only information on those crimes that come to the attention of the police and are reported by the police. UCR crime data does not contain a count of all crimes in B.C.; some crimes are never detected, and some that are detected are never brought to the attention of the police.

Victimization surveys provide data that are complementary to UCR data. These surveys are generally conducted by telephone and involve questions concerning the victimization of respondents. Victimization surveys contain information on a greater number of criminal incidents than the UCR data because victims are asked to describe both incidents they reported to the police and incidents they did not report. Victimization surveys contain methodological features that preclude information on such crimes as homicide and kidnapping, as well as "victimless crimes" (i.e., prostitution and drug offences), crimes committed against commercial or public property, and crimes committed against persons under sixteen years of age.

UCR Survey Rules

The police occurrence report forms the basis of data collection for the UCR Survey. There are standard rules for counting incidents, persons charged and clearance data under the UCR Survey. A review of the most basic UCR Survey rules, and the ramifications of each, are discussed below.

Unfounded Incidents

Reported offences (crimes reported by citizens to the police or crimes otherwise detected by police) are subject to a preliminary investigation by the police to determine the validity of the report. On occasion, a reported offence may not have actually occurred. For example, a vehicle that is reported stolen may turn out to have been borrowed by a family member. These incidents are considered "unfounded" and are subtracted from the number of reported offences to produce the number of actual offences.

In this publication, the number of offences always refers to actual rather than reported offences.

Number of Offences

The total number of UCR offences is not a census of all crimes that are reported by the police. This occurs for two reasons. First, under the UCR Survey, most violent crimes (i.e., attempted murder and homicide, sexual offences, non-sexual assault, abduction) are scored differently from property and "other" crimes (i.e., prostitution, arson, and vandalism, among others). The number of violent offences recorded is equal to the number of victims involved in an incident of violent crime. For example, when one person murders three people, three offences are recorded, whereas when three people murder one person, only one offence is recorded. For all property crimes, other crimes, and the violent crime of robbery, the total number of offences recorded is equal to the number of distinct or separate incidents. For example, in an incident where several vehicles parked in one block are spray-painted with paint from the same spray can, only one incident of vandalism is reported.

The second reason that the total number of UCR offences does not represent the total of all crime reported by the police occurs as a result of the "most serious offence" (MSO) rule. The MSO rule stipulates that where a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. There are standard rules for determining the most serious offence where crimes in the same incident are of a similar severity. The application of the MSO rule tends to underestimate the true incidence of relatively less serious crimes that come to the attention of the police because these crimes are counted only when they do not occur in conjunction with a more serious crime in the same incident.

In short, the total number of UCR offences represents the number of victims of violent crimes plus the number of separate incidents of property and other crimes.

Clearance

When the police have identified at least one offender in relation to an offence and have sufficient evidence to solve the offence, a Report to Crown Counsel (RCC) recommending charges is completed and forwarded to the local Crown counsel office. Once an RCC is forwarded, the police consider the incident to be cleared by charge and this status is reported in the UCR Survey. This occurs even if the police have not yet apprehended the accused.

In some instances, the police identify an offender and have enough evidence to support a charge but do not recommend charges. Such offences are reported in the UCR Survey as "cleared otherwise"—that is, cleared other than by recommending charges to Crown. Offences are cleared otherwise in specific situations such as the offender is under the age of 12, the victim is uncooperative, the offender has diplomatic immunity, or the offender has been sentenced for other crimes.

Persons Charged

When an offence is cleared by charge, the number of persons recommended for charge by the police is recorded in the UCR Survey. These persons are categorized according to gender and age (adult vs. youth).

The UCR Survey reporting rules dictate that offenders who are simultaneously recommended for charge on more than one offence are counted only once against the most serious offence. In addition, offenders are counted each time the police recommend charges against them (for separate incidents). Consequently, the persons charged data represents a count of the number of persons for whom charges were recommended, rather than a count of the number of separate individuals recommended for charge. As a result, the correlation of persons-charged data with court data is difficult because the UCR Survey does not contain information regarding the total number of recommended charges.

Time Lapse

UCR data are reported monthly by each of the reporting police departments and are available on this basis to interested users. Incidents are recorded in the UCR Survey against the months in which they came to the attention of police, regardless of when the incidents actually occurred. A criminal incident may be solved weeks or months after the incident is recorded in the UCR Survey. Consequently, a one-to-one relationship does not exist between the number of actual offences and the number of cleared offences in any given time frame.

Other Crime Databases

Operational Statistics Reporting (OSR) System

The Operational Statistics Reporting (OSR) System operates within the Police Information Retrieval System (PIRS) and is primarily utilized by the RCMP. The OSR is an incident-based database that stores more detailed information concerning criminal events including characteristics of the accused, victim and offence. In addition, the OSR permits the collection of special survey statistics within the province. For example, these special survey codes are used to identify cases involving spousal assault or child abuse.

Because the OSR contains three of the basic elements of the UCR Survey (i.e., MSO, clearance and persons charged), UCR aggregate data can be extracted from the OSR.

Uniform Crime Reporting II (UCRII) Survey

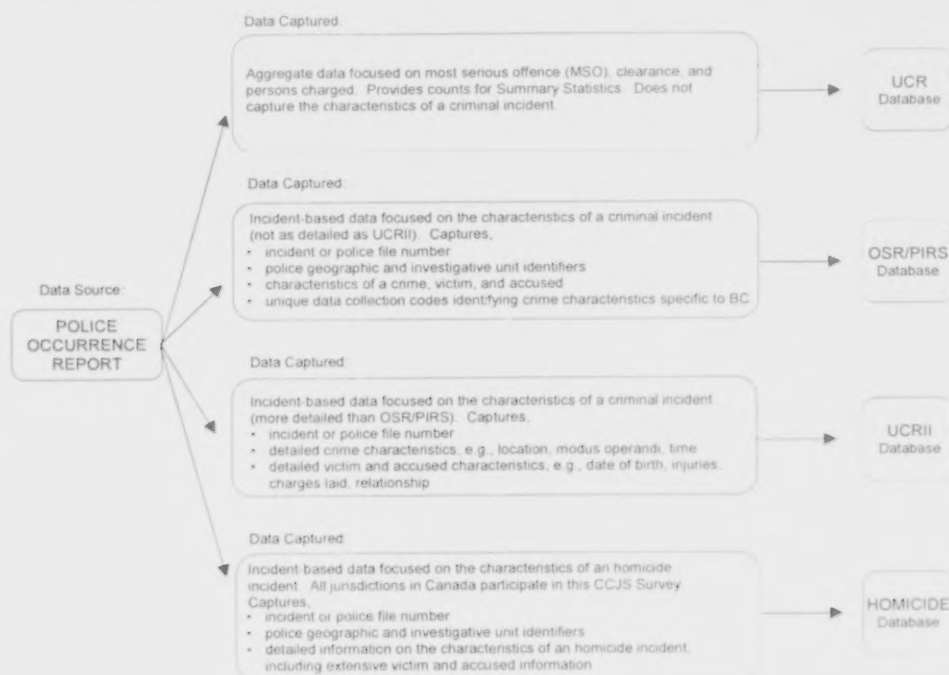

The UCRII Survey represents an expansion of the UCR Survey. It captures data at the incident level (similar to the OSR) as well as at the accused and victim levels. Examples of the data captured in the UCRII include detailed crime information (e.g., modus operandi, value of property lost), detailed accused information (e.g., date of birth, charges) and detailed victim information (e.g., date of birth, degree of injury and relationship between the victim and the accused). Because the UCRII contains three of the basic elements of the UCR Survey (i.e., MSO, clearance and persons charged), UCR aggregate data can be extracted from specific UCRII fields at the incident and accused levels.

Over 166 jurisdictions in Canada participate in the UCRII Survey. Prior to 2001, the Vancouver Police Department was the only police force in B.C. which contributed to the UCRII Survey. In 2001, however, a new integrated records management system suitable for use by all police agencies in the province was developed. This new system called PRIME (Police Records Information Management Environment) is designed to capture all the data elements of the UCRII Survey. As of 2003, PRIME has been implemented in 18 jurisdictions, and will be rolled out to the rest of the province over the next few years.

The Homicide Survey

All jurisdictions in Canada participate in the national Homicide Survey. Police agencies are required to complete a detailed survey questionnaire for each homicide they report. Aspects of the incident, including characteristics of the victim and accused, are recorded. The Homicide Survey database is administered and updated by the CCJS, and provided to PSD on an annual basis. Once the Homicide Survey data becomes available, it updates and replaces the UCR Survey homicide data.

Chart 1: Sources of Crime Data in British Columbia

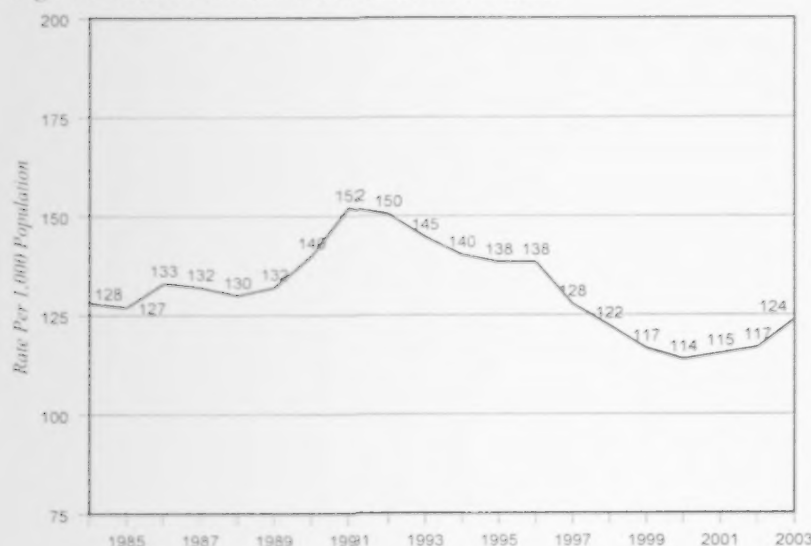

Summary of Crime in British Columbia

In 2003, there were 513,023 (non-traffic) crimes reported in British Columbia. This is 32,535 or 7% more than the 480,488 crimes reported in 2002. The 2003 crime rate was 124 crimes per 1,000 population, an increase of 6% from the 2002 crime rate of 117 crimes per 1,000 population.

Figure 1: British Columbia Crime Rate, 1984 to 2003.

This chapter provides a brief description of the number and types of Criminal Code offences, municipal and provincial crime rates, the number of crimes solved, and the number of persons charged in British Columbia. At the end of the chapter there is a discussion of youth crime.

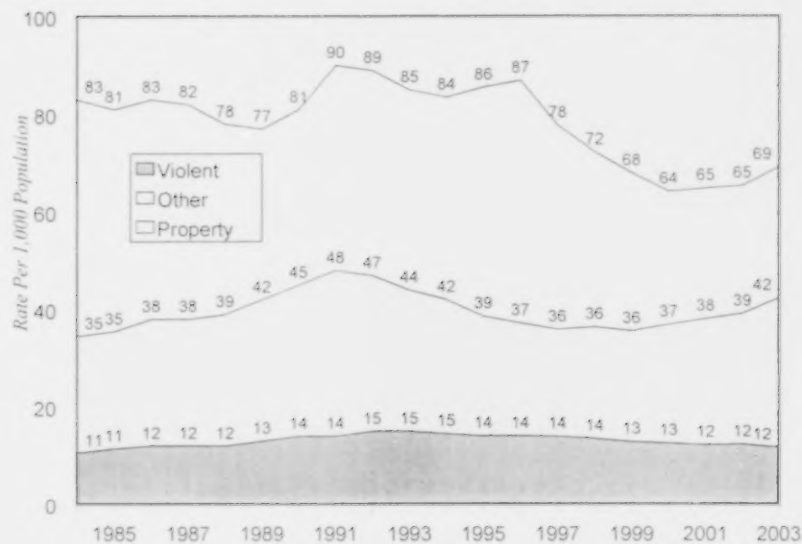

In Chapters 2, 3 and 4, the characteristics and trends of various Criminal Code offences are discussed in more detail. In Chapters 5 and 6, those offences arising from federal drug statutes, and Criminal Code and provincial traffic statutes are discussed.

CRIME RATES

The crime rate is the number of Criminal Code offences reported for every 1,000 people. It is often a better measure of trends in crime than the actual number of offences because it allows for population growth.

After peaking at a high of 152 Criminal Code offences per 1,000 population in 1991, B.C.'s crime rate decreased steadily over the next 10 years (see Figure 1). Between 1991 and 2000, B.C.'s crime rate declined by 25%.

Figure 2: British Columbia Crime Rate by Category, 1984 to 2003.

The B.C. crime rate rose by 6% in 2003. Despite this increase, B.C.'s 2003 crime rate is still one of the lowest reported in over 20 years.

Until 2001, B.C.'s crime rate had been on a downward trend during the previous 10 years. Between 1991 and 2000, B.C.'s crime rate fell by 25%. Over the past three years, however, B.C. has experienced an increase in the rate of crime. While violent crime rates have remained relatively stable, property crimes and "other" crimes have risen. Overall, between 2001 and 2003, the crime rate increased by 7% (from 115 to 124 crimes per 1,000 population). Despite this increase, it is important to note that B.C.'s 2003 crime rate is still one of the lowest reported in the province in over 20 years.

Fluctuations in the crime rate are quite often the result of changes in the number of property crimes. As shown in Figures 2 and 3, property offences have a major impact on the crime rate as they account for approximately 60% of total reported crime. The property crime rate rose 8% between 2000 and 2003, after declining by 23% between 1994 and 2000.

B.C.'s crime rate is traditionally higher than the national average. In 2003, with the exception of Saskatchewan and Manitoba, B.C.'s overall crime rate was higher than any other province. Although B.C.'s crime rate is often historically higher than the rest of the country, trends detected in the national crime rate data are frequently paralleled in B.C. For example, in 2003, Canada recorded the first substantial increase in the overall crime rate in a decade. After declining between 1991 and 1999, and stabilizing between 2000 and

2002, the national crime rate increased by 6% in 2003. (Please note this report does not include detailed comparisons with other provinces. National data are available from the Canadian Centre for Justice Statistics, Statistics Canada.)

Factors Impacting on Crime Rates

A multitude of factors are believed to affect the crime rate. Examples of these factors include:

Demographics - Demographic shifts are believed to have an impact on crime rates. Specifically, increases or decreases in the 16 to 24 age group (the age group most likely to commit crimes) can influence crime rates.

Technological Change - Criminal activity has been changing rapidly over the past decade. With continual advances in technology, opportunities for new, more complex crimes have been developed, creating new challenges for law enforcement.

Influences on police enforcement practices - Policy decisions (such as the introduction of measures to deal with violence against women and children) or legislative changes (such as the introduction of the Youth Criminal Justice Act) can affect the reporting of some types of crimes and impact on crime rates.

Victim Response to Crime - Some experts argue that victim responses to crime cause cyclical patterns in the crime rate. When crime rates are rising, potential victims take self-protective measures, causing crime rates to moderate. Conversely, when crime rates are stable or decreasing, self-protective measures also decline, creating opportunities for criminal behaviour to increase again.

Community-Based Policing - Other experts argue that community-based policing initiatives (i.e., police-community partnerships to solve local crime problems) encourages citizens to come forward and report more incidents to police, thus impacting on crime rates.

Other Factors - Factors such as age, gender, level of income and education of either the victim or offender may also affect the reporting of certain types of crimes. In addition, it has been suggested that population density and changes in public attitude may contribute to fluctuations in the reporting of certain types of crime and impact on crime rates.

It is unlikely that a single factor accounts for changes in crime rates. More likely a combination of factors accounts for changes in trends.

CRIMINAL CODE OFFENCES

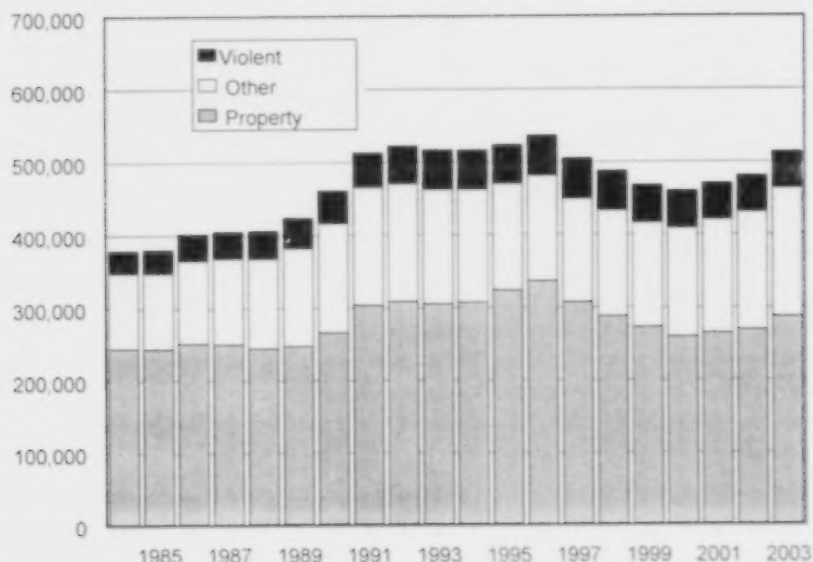

Criminal Code offences are divided into three major categories: crimes against persons (or violent crimes), crimes against property and other crimes. These Criminal Code categories do not include drug offences or offences under other federal statutes such as the Customs Act or the Canada Shipping Act. They also do not include offences under provincial statutes such as the Liquor Control and Licensing Act or the Securities Act, nor do they include Criminal Code traffic offences, provincial and municipal traffic offences, or other municipal by-law infractions.

*In 2003 there
were 513,023
reported
Criminal Code
offences, 32,535
more than
reported in
2002.*

*More often
than not, a high
crime rate
indicates that
a municipality
is a core city or
tourist
destination.*

In 2003, crimes against persons (violent offences) represented 10% (50,025) of all Criminal Code offences; crimes against property accounted for 56% (287,036); while the remaining 34% (175,962) were other crimes. These proportions have remained relatively constant over the last decade.

Figure 3: Number of Crimes by Category, 1984 to 2003.

In 2003, there were 513,023 Criminal Code offences reported, 32,535 or 7% more than in 2002. Similar to B.C.'s crime rate, the volume of crime had decreased by 10% (from 512,695 offences to 459,609 offences) between 1991 and 2000. Over the past three years, however, B.C. has experienced an increase in the volume of crime. Overall, between 2001 and 2003, the number of crimes reported in B.C. rose by 9% (from 470,126 to 513,023), comparable to volumes reported a decade ago.

Municipal Crime Rates

In 2003, municipal crime rates (the number of crimes per 1,000 resident population in a particular municipality) ranged from a low of 40 to a high of 294 Criminal Code offences per 1,000 population. The average crime rate for municipalities in British Columbia in 2003 was 129 crimes per 1,000 population.

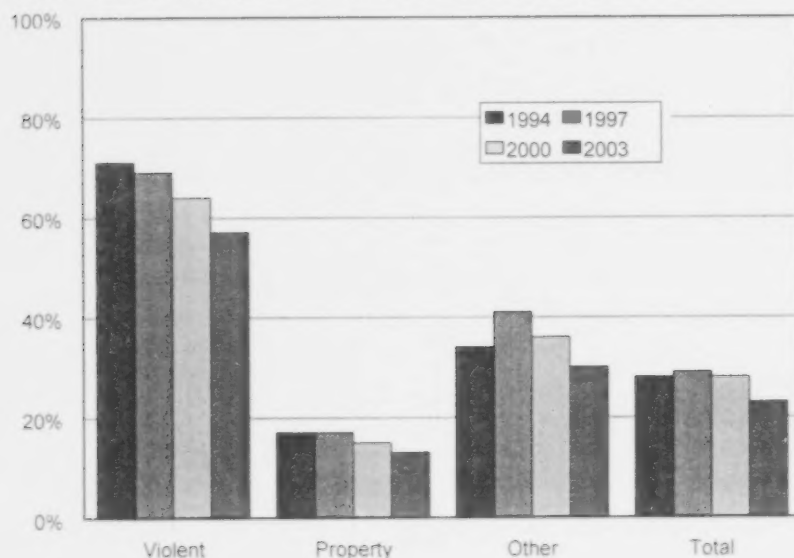

Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Unincorporated areas or other municipalities that have significant residential populations usually surround core cities. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, vacation home owners, students or seasonal staff.

The municipal crime rate is based on the resident population of a municipality that excludes commuters, students, tourists and other part-time residents. If a person from outside a municipal boundary enters and commits a crime or becomes a victim of crime, that crime is attributed to the municipality. Since the person does not reside within the municipality, he or she is not included in the municipal resident population. Consequently, core cities and tourist destinations often have higher than average crime rates. Examples of core cities include Vancouver, Victoria, Williams Lake, Courtenay and Whistler.

If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

Although municipal crime rates cannot be used to measure the relative safety of one location over another, they can be used as an indication of the trend in crime in each municipality. If two municipalities share similar characteristics, comparing their actual crime rates may be valid. However, these comparisons should be made with caution.

Figure 4: Percentage of Crimes Cleared 1994, 1997, 2000 and 2003.

Crimes Cleared (Solved)

When police solve an offence, they record that it has been cleared by charge or cleared by other means. An offence is cleared by charge when the police file a Report to Crown counsel (RCC) recommending charges. An offence is cleared by other means when the police have identified an offender and have enough evidence to support a charge, but for a variety of reasons do not recommend a charge. Offences can be cleared by other means

were young
offenders.***

under specific circumstances. These include situations where the victim is uncooperative, or the offender is either dead, or under 12 years of age, has diplomatic immunity or was previously sentenced. Police can also clear offences by other means in discretionary situations where they do not proceed with charges even though the offender has been identified and they have sufficient evidence to proceed.

In 2003, 23% (119,863) of all reported Criminal Code offences were cleared (solved). Approximately 12% (63,788) were cleared by charge, and 11% (56,075) were cleared by other means. The remaining 77% (393,160) of offences remained unsolved.

The clearance rate is the number of crimes solved by police as a percentage of the number of crimes reported to police. There is a considerable difference in the clearance rates for violent crimes compared with property and other crimes. In 2003, 57% (28,370) of violent crimes were cleared as opposed to only 13% (38,686) of property crimes and 30% (52,807) of other crimes.

Between 1993 and 1999, the percentage of violent crimes cleared remained relatively stable, ranging from 68% to 71%. Between 2000 and 2003, however, the violent crime clearance rate dropped to an annual average of 60%.

The clearance rate for property crimes remained stable at 17% between 1993 and 1999. Between 2000 and 2002, the property crime clearance rate fell to 14%. In 2003, this rate was 13%.

Clearance rates for other crimes had steadily increased from a low of 34% in 1994 to a high of 44% in 1999. In 2000, the other crime clearance rate dropped to 36%, and was reduced further by a decrease to 30% in 2003.

Persons Charged

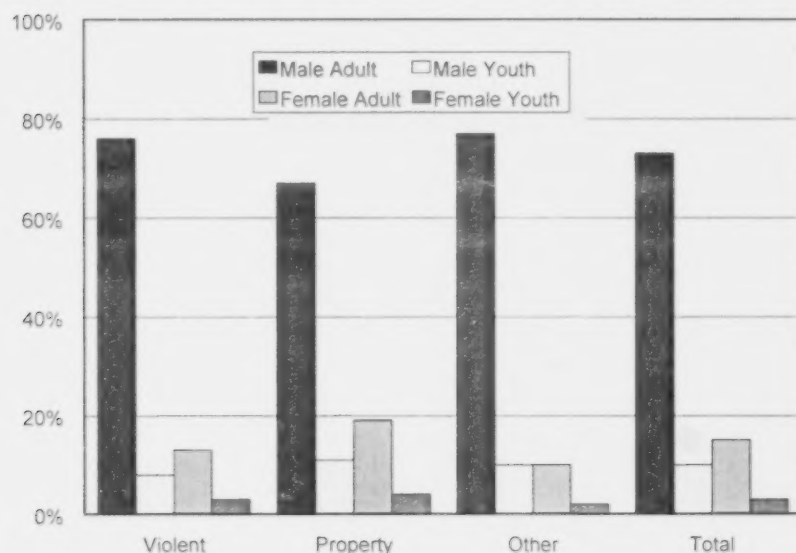

In 2003, the police reported that 61,361 persons were charged with Criminal Code offences in British Columbia. Since Crown counsel determines whether a charge will be laid, this figure actually represents the number of persons recommended for charge by the police.

Of the 61,361 persons charged, 30% (18,657) were charged with crimes of violence, 41% (24,706) with property crimes, and 29% (17,998) with other crimes. By comparison, violent crimes represent only 10% of reported crime, property crimes represent 56% of reported crime, and other crimes represent 34% of reported crime.

Persons charged data are divided into four categories: adults, male and female; and youths, male and female. In Canada, a young offender (youth) is between 12 and 17 years of age and an adult offender is 18 years and older. In 2003, of the 61,361 persons recommended for charge, 13% (7,783) were young offenders and 87% (53,578) were adults.

In 2003, approximately 83% (44,593) of the 53,578 adults charged and 76% (5,886) of the 7,783 youths charged were male. These proportions have remained constant over the last decade.

Figure 5: Persons Charged in B.C. by Gender and Type of Offence, 2003.

In 2003, adults represented 89% (16,608) of persons charged with violent crimes, 86% (21,162) of persons charged with property crimes and 88% (15,808) of persons charged with other Criminal Code offences. Young offenders represented 11% (2,049) of persons charged with violent crimes, 14% (3,544) of persons charged with property crimes and 12% (2,190) of persons charged with other Criminal Code offences.

Youth Crime

In B.C., as in the rest of Canada, young persons between the ages of 12 and 17 who break the law are subject to the same charges as adults. There is no offence known as youth crime; rather the determination that an accused person is a young offender is based on the age of the offender at the time the offence was committed.

Detecting the real extent of youth involvement in crime is difficult. The data discussed below are based on the number of youths charged with criminal offences, i.e., the number of youths for whom the police submitted a report to Crown counsel. Unless the police solve the offence, it is not known whether an adult or youth committed the crime. Therefore, data on youth crime are dependent on the identification of the offender by the police. Though less than 30% of total reported crimes are solved, it is assumed that the youth charged data (the number of Criminal Code charges reported per 1,000 population between the ages of 12 and 17) provide an indication of trends in youth involvement in crime.

There is no offence known as youth crime; rather, the determination that an accused person is a young offender is based on the age of the offender at the time the offence was committed.

**In 2003, 74%
of the criminal
offences for
which young
people were
charged were
non-violent
crimes.**

Youth Crime in 2003

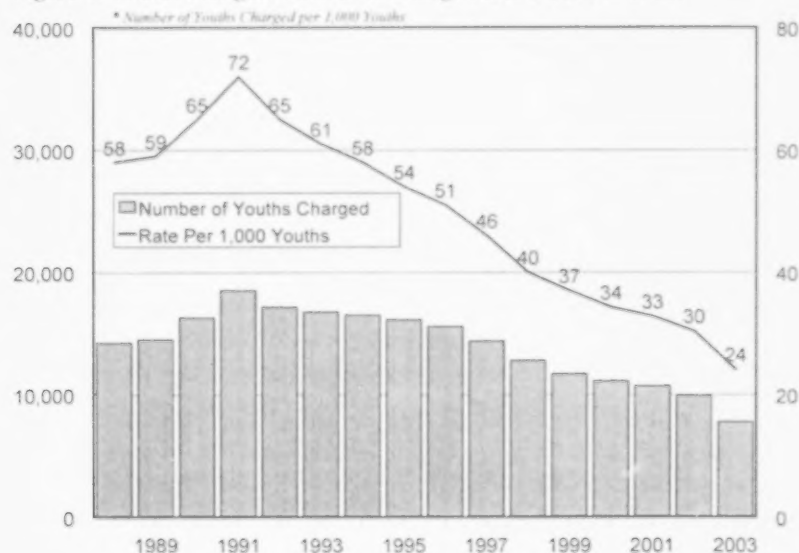

In B.C., there were 7,783 young offenders charged with Criminal Code offences in 2003, 2,101 or 21% less than in 2002. This represents a youth charge rate of 24 charges per 1,000 youths, an overall decrease of 20% from B.C.'s youth charge rate in 2002.

Approximately 74% (5,734) of the criminal offences for which young people were charged were non-violent crimes (i.e., crimes against property or other Criminal Code offences). The remaining 26% (2,049) of charges against youth were for violent crimes.

Youths represented 13% (7,783) of total persons charged in 2003. Of those youths charged, 26% (2,049) were charged with violent offences; 45% (3,544) were charged with property offences; and 28% (2,190) were charged with other Criminal Code offences.

Substantially more male youths are charged with Criminal Code offences than female youths. In 2003, slightly more than 75% (5,886) of the youths charged with Criminal Code offences were male.

Figure 6: Youths Charged, Number & Charge Rates*, 1988 to 2003.

Youth Crime Trends

During the last ten years, the total population of B.C. youths increased by 13% from 286,294 in 1994 to 322,681 in 2003. During this period, the proportion of youths in the province has, however, remained relatively stable at approximately 8% of the total population.

In 1991, the youth charge rate peaked at 72 offences per 1,000 youths. Since that time, B.C. has experienced a downward trend in youth charge rates. During the past decade, the youth charge rate has decreased almost 60% from

58 offences per 1,000 youths in 1994 to 24 in 2003. There were 7,783 charges against youths in 2003 compared with 16,528 charges in 1994, a decrease of slightly more than 50%.

The youth violent-charge rate increased steadily from the implementation of the Young Offenders Act in 1985 to a peak of 11 charges per 1,000 youths in 1994. From 1995 to 1998, the youth violent-charge rate stabilized at an average of 10 charges per 1,000 youths. Between 1999 and 2003, however, it decreased from 8 charges per 1,000 youths in 1999 to 6 charges per 1,000 youths in 2003. Crime data over the past ten years indicate that youths charged with level 1 non-sexual assault (the least serious assault category) represent almost 50% (990) of B.C. youth charged with violent crimes. It is increases or decreases in this category of crime that largely contributes to fluctuations in the youth violent-charge rate.

Over the past 10 years, the number of female youths charged in B.C. peaked in 1995 with 3,846 charged and has been falling since that time. Between 1996 and 2003, the number of B.C. female youths charged has declined by 50%. Similarly, the number of male youths charged in B.C. peaked in 1994 with 12,841 charged. Since that time, the number of male youth charged has declined by slightly more than 50%.

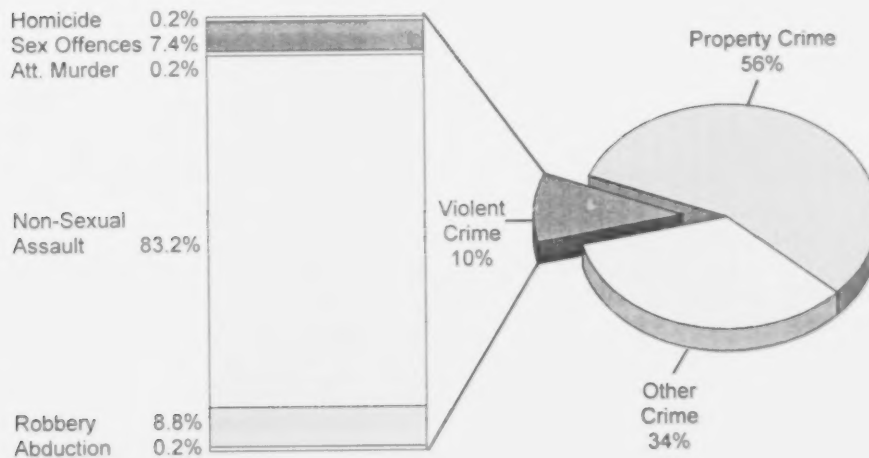

Legislative Changes Dealing With Young Offenders

On April 1, 2003, the Youth Criminal Justice Act (YCJA) replaced the Young Offenders Act. The new legislation is primarily aimed at differentiating between violent or repeat offenders, and first-time offenders who commit non-violent or less serious crimes. The YCJA stipulates sentencing based on the seriousness of the crime and encourages sentencing which is community based (i.e., victim compensation, community service and supervision). In addition, the Act provides for the imposition of adult sentences as well as rehabilitative custody and supervision sentences in the case of violent and high-risk offenders.

Violent Crime in British Columbia

Figure 7: Violent Crime by Category, 2003.

Crimes against persons, more commonly called violent crimes, are considered the most serious of the three Criminal Code offence categories. Approximately 10% (50,025) of all crime reported during 2003 was categorized as violent. These crimes include homicide, attempted murder, sexual and non-sexual assault, robbery and abduction. Crimes in this category carry the maximum penalty under the law.

Violent Crime in 2003

There were 50,025 violent offences in 2003, 37 more than the 49,988 violent offences reported in 2002, resulting in a less than 1% increase in the number of violent crimes and a less than 1% decrease in the violent crime rate (from 12.15 violent crimes per 1,000 population in 2002 to 12.06 violent crimes per 1,000 population in 2003).

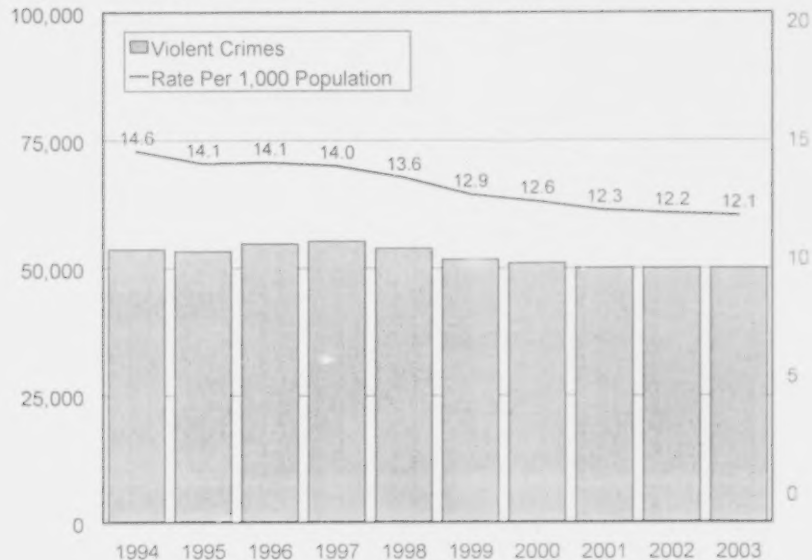

More violent crimes are cleared (solved) than any other type of crime. In 2003, 57% (28,370) of violent crimes were cleared as opposed to only 13% (38,686) of property crimes, and 30% (52,807) of other crimes.

Of the 18,657 persons charged with violent offences in 2003, 76% (14,163) were adult males, 13% (2,445) were adult females, 8% (1,489) were male youths and 3% (560) were female youths.

Violent Crime Trends

In 2003, the number of violent crimes reported increased for the first time in six years. After peaking at 55,326 offences in 1997, violent crimes had decreased annually at a rate of 2% per year until 2003.

Figure 8: Number and Rate of Violent Crimes, 1994 to 2003

In 2003, the number of violent crimes reported increased for the first time in six years.

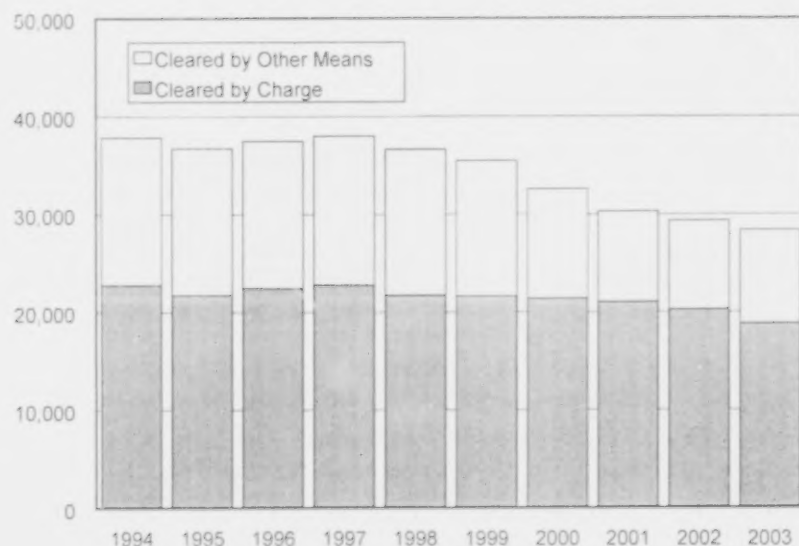

Between 1994 and 2003, the violent crime rate decreased. It fell from 14.6 violent crimes for every 1,000 persons in 1994 to 12.1 in 2003, an overall decrease of 17%. As with the number of violent crimes, the violent crime rate, while decreasing over the past decade, is still 10% higher than 20 years ago.

It is important to note that increases in violent offences over the past twenty years might be due to factors other than an increase in the number of these crimes being committed. Changes to federal legislation concerning sexual and non-sexual assault have likely had an impact on the reporting of these offences. Under the revised legislation the previous categories of assault and battery were merged into one offence, and the types of assault reorganized into a three-tiered system of offences based on the seriousness of harm and violence. Moreover, procedural changes to the legislation enhanced the ability of police to make arrests and recommend charges. Heightened public awareness and reduced tolerance of violence may also have led to increased reporting of violent crimes. Finally, the stigma of being victimized may be less pronounced today than previously. As a result, crimes of violence that occurred in the past are being reported and recorded in the present.

Despite the overall increase in violent crime during the past 20 years, within the past decade, there have been decreases in the categories of homicide, attempted murder, sexual offences, abduction and robbery. In total, the number of offences reported within these categories declined by 28% from 11,651 in 1994 to 8,426 in 2003, primarily driven by a decline in the number of reported sexual assault offences. During this period, however, the remaining violent crime category of non-sexual assaults decreased by only 1%, from 42,046 offences reported in 1994 to 41,599 offences in 2003.

Between 1994 and 2003, the number of sexual offences reported has declined 37% from 5,865 in 1994 to 3,701 in 2003, a decrease of 2,721 offences. This includes a 35% decrease in level 1 sexual assaults reported, a 58% decrease in level 2 sexual assaults (those involving a weapon or serious bodily harm), and a 21% decrease in the number of level 3 aggravated sexual assaults.

Figure 9: Number of Violent Crimes Cleared (Solved), 1994 to 2003.

The overall decline in violent crimes has been offset by the relative stability in the number of level 1 assault offences reported. Over the past 10 years, the number of level 1 assault offences has averaged 34,240 each year. Level 1 assault represents two-thirds of violent crime reported and is a major driver of violent crime rates.

The number of persons charged with violent crimes has decreased by 15% in the last ten years. In 2003, 18,657 persons were charged with violent offences compared with the 22,006 persons charged in 1994.

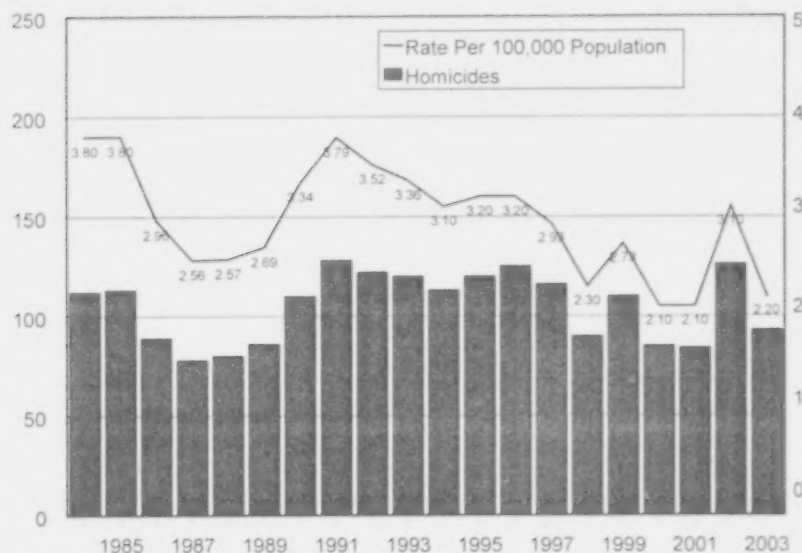

Increases in reported violent offences over the past 20 years may be due to factors other than an increase in the number of these crimes being committed.

**There were
93 victims of
homicide
reported in
2003.**

Homicide

In Canada, homicide offences are classified into four categories as defined by the Criminal Code: first degree murder, second degree murder, manslaughter and infanticide. First degree murder occurs when the death is planned and deliberate, or occurs during the commission of another serious offence or when the victim is a peace officer. Second degree murder is all murder that is not in the first degree. Manslaughter is generally a homicide committed in the heat of passion. Infanticide occurs when a mother causes the death of her newly born child. Deaths caused by criminal negligence, suicide, accidental or justifiable homicide are not included in the criminal homicide classification.

Figure 10: Number and Rate of Homicides, 1984 to 2003.

Homicide in 2003

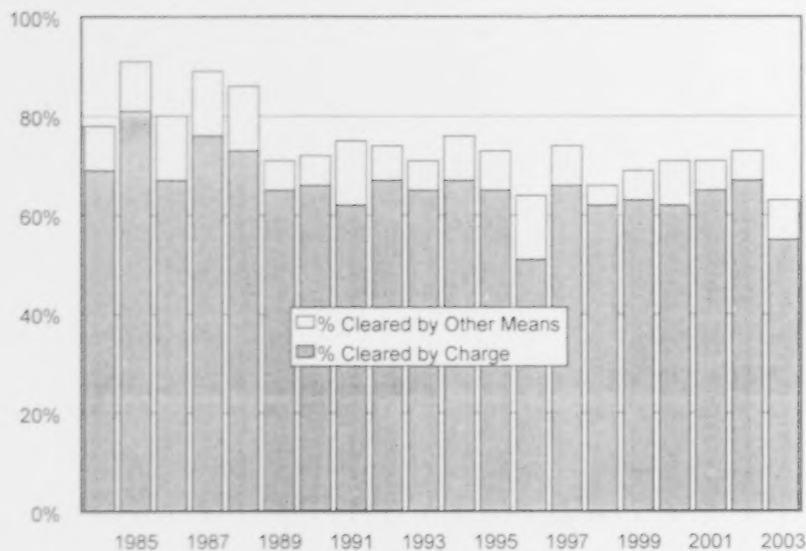

In 2003, there were 93 homicide victims in B.C., 33 less than the number reported in 2002. This represents a 26% decrease from 2002. It is important to note that the 126 homicides reported in 2002 included 15 homicides that were known to have occurred in previous years but were not recorded until 2002.

An average of 106 homicides have been reported in B.C. over the past decade, ranging from a high of 126 recorded in 2002 to a low of 84 reported in 2001. The 93 homicides reported in 2003 is within this range.

Of the homicides reported in 2003, 57% (53) were first degree, 30% (28) were second degree, 12% (11) were manslaughter, and 1% (1) were infanticide. Since the number of homicides calculated per 1,000 population is fractionally small, homicide rates are calculated on a per 100,000 population basis. In 2003, the homicide rate was 2.2 homicides per 100,000 population, within range of the 10-year average of 2.7 homicides per 100,000 population.

Police cleared (solved) 62% (58) homicides in 2003, 54% (51) were cleared by charge and 8% (7) were cleared by other means. Over the past decade, homicide clearance rates have fluctuated between 59% and 87%. Caution should be used in interpreting homicide clearance rates. Homicides may be solved many months or years after the year in which the homicide was reported. As a result, the number of homicides reported and the number of homicides cleared for a specific year are not necessarily linked.

Figure 11: Percentage of Homicides Cleared, 1984 to 2003.

**Police charged
60 persons with
homicide in
2003.**

There were 60 persons charged with homicide in 2003, 81% (49) were male adults, 12% (7) were female adults, and 7% (4) were male youths. As in previous years, the majority, 88% (53), of persons charged with homicide were male and only 7% (4) of persons charged were young offenders.

Of the 93 homicides in 2003, over half (52) were killed by someone they knew. When the victim was killed by someone he or she knew, 27% (14) were killed by their spouse or ex-spouse, 19% (10) were killed by a family member other than a spouse or ex-spouse, and 54% (28) were killed by an acquaintance or friend.

In 2003, 68% (63) of homicide victims were male and 32% (30) were female. Almost 78% (73) of the homicide victims were between the ages of 18 and 50, while 7% (6) of homicide victims were under the age of 18 and 15% (14) were over the age of 50.

Of the total homicide victims in 2003, 39% (36) were killed by shooting, 34% (32) were either beaten to death, or killed by other means, 16% (15) were stabbed, and 11% (10) were strangled or suffocated. Of those victims killed by shooting, three out of four were killed by handguns.

***Between 1994
and 2003, an
average of
70% of all
homicides were
solved.***

Homicide Trends

Historically there have been more homicides per capita reported in B.C. than in any other province. B.C.'s homicide rate in 2003 was the third highest provincial rate in the country. Despite a higher than average homicide rate (the national homicide rate in Canada was 1.7 per 100,000 population in 2003), B.C. trends parallel national trends.

In 2003, the homicide rate was 2.2 homicides per 100,000 population, a 27% decrease from the 2002 rate of 3.1 homicides per 100,000 population. During the past 25 years, the homicide rate has fluctuated between 2.1 and 4.4 homicides per 100,000 population. The 2000 and 2001 homicide rates (2.0) were the lowest recorded rates in British Columbia over this time period.

Over the last two decades in British Columbia there have been substantially more male victims of homicide, sometimes up to three times as many as female victims.

Homicide Survey Results

In 1999, Police Services Division conducted a survey of homicide offences in British Columbia, the results of which were released in B.C. Crime Trends Newsletter, Issue #4, (September 2000). Even though each homicide is a unique criminal event, the survey revealed the following characteristics of homicides in B.C.:

- A "typical" murder is committed in a single home by a male adult between 18 and 34 years of age.
- The victim is a male between 19 and 34 years of age and the homicide is usually precipitated by an assault.
- The accused is a casual acquaintance of the victim.
- The victim will have been either stabbed or shot.
- The police, in most cases, solve the homicide through the laying of charges.

B.C.'s Unsolved Homicide Unit

In 1996, the provincial government announced the creation of the Unsolved Homicide Unit, an integrated police unit made up of members from the RCMP and the Vancouver Police Department. The purpose of the Unit is to ensure the effective coordination of investigations into unsolved homicides that have occurred over the past 35 years.

Attempted Murder

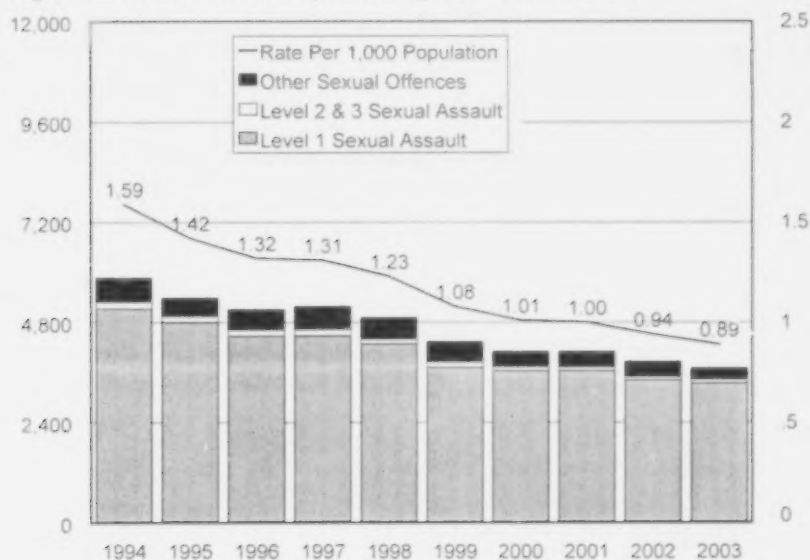

In 2003, there were 110 attempted murder offences in British Columbia. This is a 29% increase from the 85 offences reported in 2002. Between 1994 and 2003 there was an average of 106 attempted murders per year in B.C. A high of 136 attempted murders was reported in 1997, and a low of 85 attempted murders was reported in 1999 and 2002.

The attempted murder rate in 2003 was 2.7 offences per 100,000 population (as with homicides, attempted murder rates are calculated on a per 100,000 population basis). This is one of the lowest recorded rates in the past ten years. During this same period, the attempted murder rate has ranged from a high of 3.4 reported in 1997 to a low of 2.1 reported in both 1999 and 2002.

In 2003, 65% (72) of attempted murders were cleared, all of which were cleared by charge. On average, the attempted murder clearance rate was slightly less than 80% over the past decade.

There were 74 persons charged with attempted murder in 2003, 85% (63) of whom were adults. As in previous years, the majority, 82% (61), of persons charged were male and only 15% (11) were young offenders.

Sexual Assaults and Other Sexual Offences

Law reforms introduced by the Canadian government in 1983 and 1988 served to change the substantive, procedural and evidentiary aspects of Canada's rape law. Under the revised legislation, the crimes of rape, attempted rape and indecent assault were repealed and replaced with a three-tiered system of sexual assault. In addition, new sexual offences were introduced to deal specifically with child sexual abuse (i.e., sexual interference, touching and exploitation).

The three-tiered system of sexual offences is based on the seriousness of harm and violence. Level 1 sexual assault occurs when any form of sexual activity without bodily harm is forced upon another person; level 2 sexual assault occurs when a person is sexually assaulted by someone who uses or threatens to use bodily harm or a weapon; and level 3 sexual assault occurs when a person wounds, maims, disfigures, beats or endangers the life of a person during a sexual assault.

***The 3,701
sexual crimes
reported in 2003
represent the
lowest number
of sexual
crimes reported
during the last
15 years.***

The intent of the law reforms was threefold: first, to reflect the violent rather than the sexual nature of the offences; second, to expand the opportunities for courts to receive children's testimony in cases of child sexual abuse; and, finally, to broaden the scope of sexual offences by presenting the offences as gender neutral as opposed to offences against females only.

Sexual Assault in 2003

In 2003, a total of 3,701 sexual assaults and other sexual offences were reported in British Columbia, a decrease of 150 offences or 4% from the 3,851 offences reported in 2002. The 3,701 sexual crimes reported in 2003 represent the lowest number of sexual crimes reported during the last fifteen years.

In 2003, 90% (3,340) sexual crimes reported in B.C. were classified as level 1 sexual assaults, whereas 2% (84) were level 2 and level 3 sexual assaults. Another 8% (277) of the total were other types of sexual offences such as sexual touching or interference, sexual exploitation and incest.

The sexual offence rate (the number of sexual offences per 1,000 population) in 2003 was slightly less than 1 per 1,000 population. Of the 3,701 sexual crimes reported, 54% (2,000) were cleared, 44% (1,623) by charge and 10% (377) were cleared by other means.

Of the 1,337 persons charged with sexual offences in 2003, 85% (1,142) were male adults, 1% (13) were female adults, 13% (177) were male youths and less than 1% (5) were female youths. These proportions have remained about the same over the last ten years.

Sexual Assault Trends

A ten-year trend analysis of sexual offences reveals that the total number of reported offences peaked in 1994 at 5,865 and has been declining since that time. Despite the recent decreases, the number of reported sexual offences has grown substantially since the early 1980s, not only in B.C. but also across Canada. The sexual offence rate peaked at a high of 1.8 in 1992 and 1993, but has been steadily declining since that time. Even though the 2003 sexual offence rate of 0.89 per 1,000 population is the lowest rate reported in more than ten years, it is still 60% higher than the rate recorded 25 years ago.

Trends in sexual assault offences have likely been influenced by many factors, including higher levels of reporting, changes in societal attitudes toward the reporting of sex crimes, the reporting of historical sexual offences, and changes in federal legislation discussed above.

Sexual Assault Survey Results

Police Services Division conducted a survey of sexual assaults reported to police during 1993 and 1994. The findings of this survey are available in full from Police Services Division's Survey of Sexual Assaults Reported to Police in British Columbia, 1993-1994. The survey revealed the following characteristics of a "typical" sexual assault in B.C.:

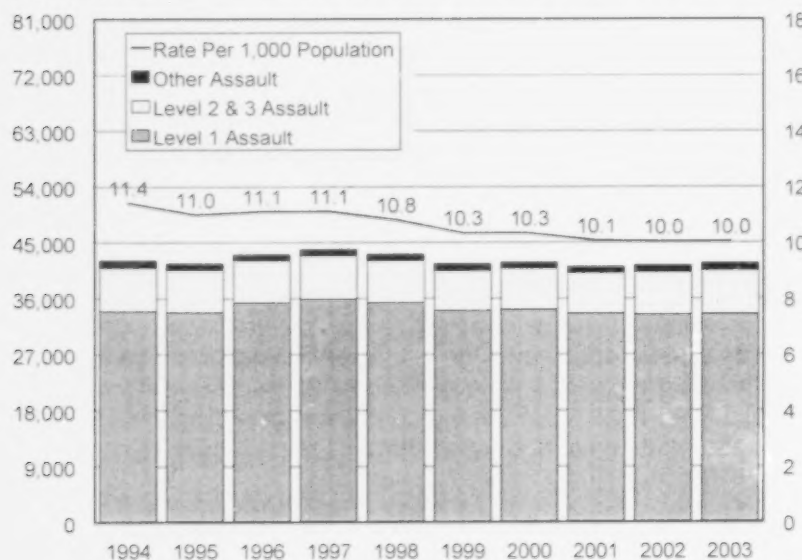

- The victim is female under the age of 19 (if under the age of 19 then the victim is likely between the ages of six and 12).

- The accused is male, over the age of 17, and is either a family member or a friend of the victim.
- If the accused is a male relative of the victim, then he is most likely her father or stepfather.
- The offence occurs once or during a period of less than one month, and takes place at the victim's home, the accused's home or a home shared by both.
- Fifty percent of the persons charged with a sexual assault have a previous criminal record; the record, however, the record is not likely for violent or sexual offences.
- The police will clear (solve) the offence, most likely by recommending charges.

Non-Sexual Assault

Revisions to federal assault legislation established three levels of non-sexual assault offences similar to those provided for sexual assaults. Level 1 non-sexual assault, the least serious of these offences, does not involve a weapon or serious physical injury; level 2 involves a weapon or results in bodily harm; and level 3 is aggravated assault or assault that is life-threatening. The ability of the police to make arrests and recommend charges in all types of assaults was enhanced by these revisions.

Figure 13: Number and Rate of Non-Sexual Assaults, 1994 to 2003.

In addition to the three levels of assault, non-sexual assaults also include the offences of assaulting a police officer or other officer, shooting with intent (firing a gun, rifle or airgun with the intention of hurting or endangering the life of another person), and causing unlawful bodily harm (any intentional harm to another person by any means).

Assaults

**accounted for
83% of violent
crime reported
in 2003.**

Non-Sexual Assault in 2003

In 2003, 41,599 assaults were reported. This represents an increase of less than 1% (366 offences) from the 41,233 assaults reported in 2002. Non-sexual assaults accounted for 83% of the 50,025 violent crimes reported in B.C. in 2003.

In 2003, 80% (33,440) of the total number of assaults were classified as level 1, compared with 16% (6,750) as level 2 and 1% (291) as level 3 offences. Other assault offences accounted for the remaining 3% (1,118) of offences.

In 2003, 60% (24,779) of assaults were cleared (solved), 38% (15,810) were cleared by charge and 22% (8,969) were cleared by other means.

Of the 15,656 persons charged with assault in 2003, 90% (14,055) were adults and the remaining 10% (1,601) were youths between 12 and 17 years of age. In the same year, males represented 84% (11,753) of the adults charged and almost 70% (1,110) of youths charged.

In 2003,

60% of assaults

were cleared

(solved).

Non-Sexual Assault Trends

During the past decade, assaults have accounted for four out of five violent crimes. The number of assaults reported during the past decade has remained very stable, averaging 42,100 per year, and ranging from a high of 43,851 in 1997 to a low of 41,039 in 2001.

Level 1 assaults represent 80% of assaults and three out of five violent crimes. Over the past ten years, these types of offences have decreased 1% from 33,875 in 1994 to 33,440 in 2003. Between 1994 and 2003, the number of Level 2 and Level 3 assaults, (e.g., assault of a police officer, shoot with intent) remained stable decreasing less than 1%. Overall, the assault rate has declined 12% over the past 10 years, dropping from 11.4 per 1,000 population in 1994 to 10 in 2003.

Non-Sexual Assault Survey Results

Police Services Division conducted a survey of non-sexual assaults reported to police during 1995. The survey revealed the following characteristics of a "typical" level 1 assault in B.C.:

- The victim is equally likely to be male or female and is most likely between the ages of 18 and 35.
- Eight out of ten accused are male and are most likely between the ages of 18 and 35.
- In two-thirds of the incidents the victim and accused know each other.
- Three out of ten level 1 assaults are spousal assaults.
- In almost half the incidents the assault takes place in the victim's home, the accused's home, or a home shared by both.

- One in ten assaults occurs in a bar or restaurant.
- More than half of the accused charged with level 1 assault have a prior criminal record, and 40% of those records are for a previous violent or weapons offence.
- More than one-third of the incidents are cleared by charge by the police. Crown counsel proceeds with police-recommended charges 85% of the time.
- In more than 40% of the incidents where charges are laid, the accused is convicted of at least one criminal offence.
- In the remaining incidents proceeded with by Crown, the accused is not convicted. For those charges that end in a non-conviction, charges are most frequently be stayed (with or without a recognizance).

Spousal Assault

There is no Criminal Code offence known as spousal assault; rather, the determination that an offence is a spousal assault is based on the finding that an offender committed an offence (e.g., homicide, assault, criminal harassment) against his or her spouse. As such, the number of spousal assault incidents reported represents the number of Criminal Code incidents that contain supplementary information indicating that a crime against a spouse has occurred.

The number of spousal assault incidents does not necessarily count the number of different victims of a spousal assault. For example, if the same person is a victim of spousal assault at different times and has reported these crimes when they occurred, each incident would be recorded separately, and in effect the same victim would be counted more than once.

The reporting of spousal assault offences in British Columbia is supported by the provincial government's Violence Against Women in Relationships (VAWIR) policy. The VAWIR policy directs officials in the justice system (including police, Crown counsel, probation officers, victim assistance workers, and others) to emphasize the criminality of violence and to take the necessary measures to ensure the protection of women and children who may be at risk. The policy states that when attending an incident involving violence between spouses, and where there are grounds to believe an offence has occurred, police officers should always make an arrest when it is in the public interest. The policy shifts the responsibility to lay charges from the victim to the criminal justice system. The policy defines a spouse as a marital partner, a common-law partner or a partner in a dating or intimate relationship. Spousal assaults also include assaults between partners in same-sex relationships.

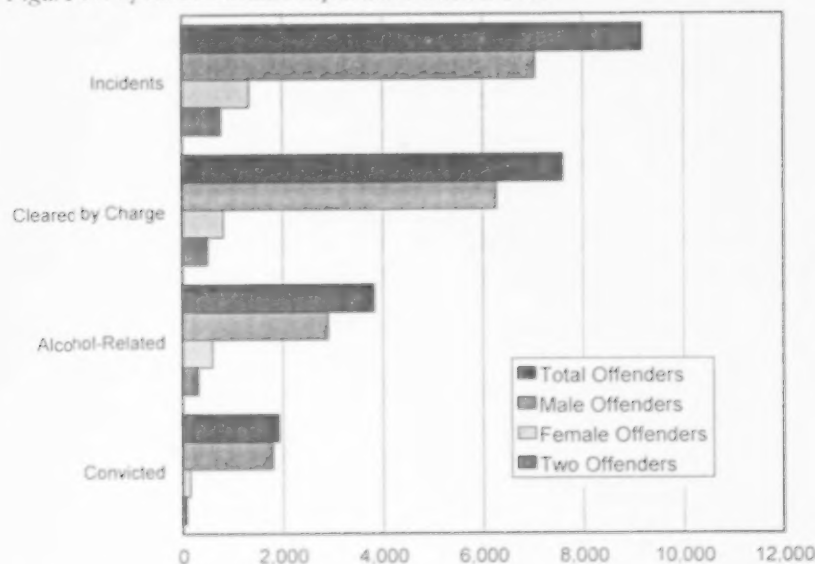

In 2002, British Columbia's spousal assault policy (VAWIR) was revised. These policy changes recognized the difficulties inherent in prosecuting spousal assault cases. Crown counsel now has enhanced prosecutorial discretion as well as a number of other measures designed to resolve low-

***The

In 2003, the spousal assault rate remained stable at 2.2 spousal assaults per 1,000 persons.

risk spousal assault cases outside of the courtroom setting. In addition, the policy revisions provided for additional options relating to the protection and treatment of both victims and offenders.

Figure 14: Spousal Assaults Reported to Police, 2003.

Spousal Assault in 2003

In 2003, there were 9,186 incidents of spousal assault reported in British Columbia, a slightly more than 1% increase from the 9,077 reported in 2002. The spousal assault rate in 2003 remained stable at 2.2 spousal assaults per 1,000 population.

Spousal assault offences fall into three categories: incidents where the offender is male, incidents where the offender is female and incidents where both spouses are involved. In 2003, 77% (7,059) of spousal assault incidents involved a male offender, 15% (1,345) involved a female offender and 8% (782) involved both spouses assaulting each other. These proportions have remained relatively constant since 1993.

Spousal assaults are primarily a subset of non-sexual assault offences. In 2003, Criminal Code assault offences associated with spousal assault incidents accounted for 21% (8,896) of all assaults.

Although the majority of spousal assaults in 2003 involved the offence of non-sexual assault, there were 300 Criminal Code offences such as homicide, robbery, theft, and break and enter which also occurred in the context of a spousal assault.

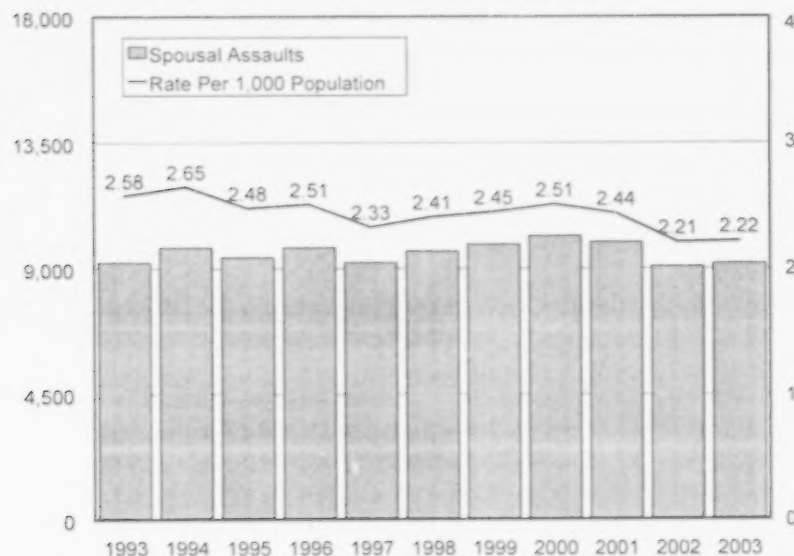

Approximately 90% of the 10,156 Criminal Code offences reported within spousal assault incidents were cleared during 2003. 75% (7,606) were cleared by charge and 15% (1,523) were cleared by other means. Of the 7,459 persons charged, 81% (6,025) were charged in incidents where the offender was male, 11% (811) were charged in incidents where the offender was female, and 8%

(623) were charged in incidents involving both spouses. Over 40% (3,829) of spousal assault incidents were alcohol-related.

Spousal Assault Trends

Between 1994 and 2003, the total number of reported spousal assault incidents fluctuated from a low of 9,077 reported in 2002 to a high of 10,156 in 2000. The spousal assault rate (number of spousal assaults per 1,000 population) remained relatively stable during the same period, averaging approximately 2.5 spousal assaults per 1,000 population. In 2002 and 2003, the spousal assault rate remained stable at 2.2.

Figure 15: Number and Rate of Spousal Assaults, 1994 to 2003.

The percentage of Criminal Code offences occurring within spousal assault incidents which are cleared (either by charge or by other means), has remained steady at over 90% during the last ten years. The percentage of these crimes cleared by charge has climbed each year during the past ten years, rising from 62% reported in 1993 to a high of 81% reported in 2000 and 2001.

In 2003, the percentage of offences cleared by charge was considerably higher for spousal assault incidents (75% or 7,489 offences cleared by charge) compared to non-spousal assault incidents (38% or 15,810 offences cleared by charge). This trend has also been apparent during the past ten years. Overall, these data indicate that the police are recommending charges in cases involving violence in relationships.

There was also an overall increase in the number of persons charged in connection with spousal assault incidents during the past ten years. Between 1994 and 2003, total persons charged rose from 7,185 to 7,459, an increase of 4%.

The number of spousal assaults in which alcohol use was a factor has remained consistent at or close to 50% between 1994 and 2003.

The number of spousal assaults in which alcohol use was a factor has remained consistent at about 50% between 1994 and 2003.

relationships.***

Spousal Assault Survey Results

Police Services Division conducted a survey of spousal assaults reported to police during 1995. The findings of this survey are available in full from Police Services Division's Survey of Spousal Assaults Reported to Police in 1995 in British Columbia. The survey revealed the following characteristics of a "typical" spousal assault in B.C.:

- The victim is female and is most likely between the ages of 25 and 35.
- The accused is male and similarly, is most likely between the ages of 25 and 35.
- The victim and accused are in a common-law relationship and the offence occurs in a home shared by the victim and accused.
- More than half of the incidents involve alcohol.
- More than two-thirds of the accused charged have a prior criminal record and half of those records are for a previous violent offence.
- Three-quarters of the incidents are cleared by charge by the police and Crown counsel approves nearly all these incidents. More than half of the incidents proceed on a single charge and that charge is most likely a level 1 assault (assault that does not involve a weapon or serious bodily harm).
- In approximately half of the incidents proceeded with by Crown, the accused is convicted of at least one criminal offence.
- Of those charges that result in conviction, the offender is likely to receive a suspended sentence with probation, be incarcerated for a period of one to six months, or be put on probation (with or without a fine).
- In the remaining incidents proceeded with by Crown, the accused is not convicted. For those charges that end in a non-conviction, charges are most frequently stayed (with or without a recognizance).

Notably, many findings of Police Services Division's survey of spousal assaults parallel those reported in the 1998 Canadian Centre for Justice Statistics report, *Family Violence in Canada: A Statistical Profile*.

Robbery

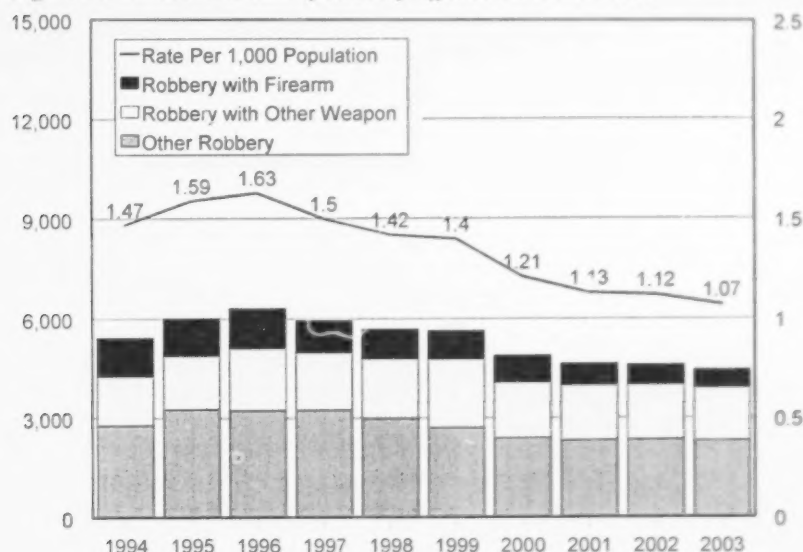

Robbery offences are divided into three categories: robbery with a firearm, robbery with another weapon and other robbery. Other robbery includes assault with intent to steal (mugging) and stopping a mail conveyance with the intent to rob or search it.

Unlike other violent crimes in which an offence is counted for every victim, only one robbery offence is counted per incident regardless of the number of victims in that incident.

After remaining relatively constant throughout the 1980s, the number of robberies increased steadily in the early 1990s, rising to a 20-year high of 6,304 offences in 1996. Between 1997 and 2001, however, the number of robberies reported decreased an average of 5% per year. In 2003, 4,443 robbery offences were reported, a decline of 3% from the 4,601 reported in 2002.

In 2003, 52% (2,315) of robbery offences were classified as other robbery, compared with 36% (1,591) as robbery with a weapon other than a firearm, and 12% (537) as robbery with a firearm.

Figure 16: Number and Rate of Robbery Offences, 1994 to 2003.

In 2003, there were 4,443 robberies reported, a decrease of 3% from 2002.

In 2003, 32% (1,426) of robberies were cleared (solved), 28% (1,236) were cleared by charge and a 4% (190) were cleared by other means.

Adults comprised 83% (1,253), and young offenders accounted for 17% (251) of the 1,504 persons charged with robbery in 2003. Males represented almost 90% (1,342) of the total adults and youths charged with robbery.

Robbery Survey Results

In 1996, Police Services Division conducted a survey of robbery offences in British Columbia, the results of which were released in B.C. Crime Trends Newsletter, Issue #3 (March 2000). The survey revealed the following characteristics of a "typical" robbery in B.C.:

- One-third of robberies occurred on a street, road or highway. An additional 9% occurred in other outdoor areas including parks, school grounds and parking lots. Approximately 8% of the robberies occurred at convenience stores, 8% in homes, 7% at banks, and 6% at gas stations.
- Two-thirds of the surveyed victims were male and one-third were female.
- Approximately 27% of the victims were between the ages of 11 and 20 years while another 21% were between the ages of 21 and 30 years.
- A lone victim was involved in eight out of ten incidents.
- Physical force was used in 56% of the robberies while threats of violence were used in another 32% of incidents.

- In approximately half of the incidents a weapon was used during the robbery. Of these incidents, 41% of the weapons were knives and 27% were firearms.
- In eight out of ten surveyed robberies the accused was male. Youths (between the ages of 12 and 17 years) were identified as accused persons in 30% of the robberies while an additional 32% of the accused were between the ages of 18 and 25 years. Half of the robberies involved a lone accused, while another 28% involved two accused persons.
- Of the surveyed incidents, approximately one-third were cleared by charge (solved) and the remaining two-thirds were not cleared (unsolved). An accused was not identified in almost all of the incidents that remained unsolved.

***Over the past
10 years, an
average of 103
abductions
occurred each
year.***

Abduction

There are four separate categories of abduction, each of which refers to the removal of a child from the parent or guardian's care. These offences are different from the offence of kidnapping, which refers specifically to the forcible removal or confinement of a person regardless of age or relationship. Abduction is characterized by behaviours such as unlawfully taking, enticing away, harbouring, or concealing a young person.

The current laws regarding abduction were enacted in 1983; they replaced sections of the Criminal Code that were only applicable to the abduction of females under a specific age.

The four categories of abduction are as follows: abduction of an unmarried person under the age of 16 against the will of a parent or guardian; abduction of a person under the age of 14 with the intent of depriving the parent or guardian of possession of the child; abduction by a parent or guardian of anyone under the age of 14 in contravention of a custody order, with the intent to deprive the person with legal custody of having custody of the child; and abduction of a person less than 14 years of age by a parent or guardian where there is no custody order, with the intent to deprive the other parent of the child.

In 2003, there were 79 abduction offences, 14% less than the 92 abductions reported in 2002. Of these 79 abductions, 32% (25) were abductions of children under the age of 14, 38% (30) were abductions in contravention of a custody order, 18% (14) were abduction of a child under 14 (without a custody order), and the remaining 12% (10) were abductions of persons under the age of 16. Over the past ten years, there was an average of 103 abductions each year in British Columbia.

In 2003, 44% (35) of abductions were cleared (solved), 34% (27) were cleared by charge while 10% (8) were cleared by other means. Of the 26 offenders charged with abduction in 2003, 54% (14) were male, and 46% (12) were female.

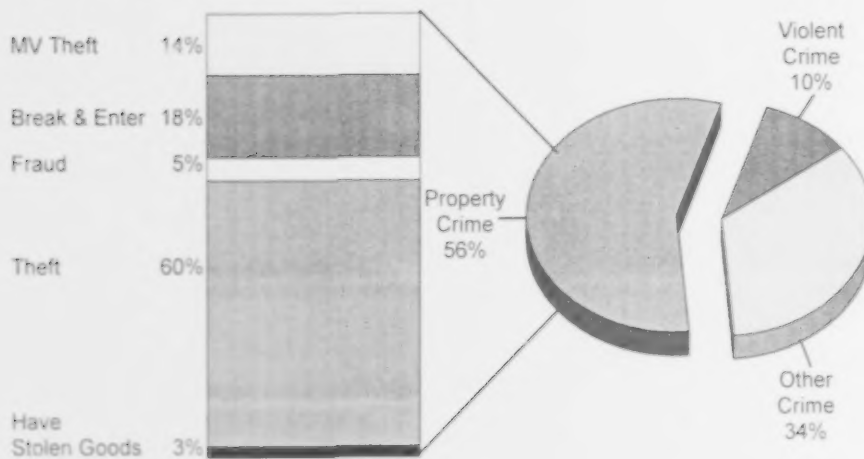

Other Crimes Against Persons

There are other Criminal Code offences that are not included in the violent crime category, but may constitute a crime against another person (as opposed to property). The most evident of these offences is criminal harassment. Within the federally prescribed method of coding criminal offences for the UCR Survey, criminal harassment crimes are included in the "other" crime category. Consequently, criminal harassment is discussed in more detail in Chapter 4.

*Criminal
harassment
crimes are
included in the
"other" crime
category.*

Property Crime in British Columbia

Figure 17: Property Crime by Category, 2003.

Property crimes represented 56% (287,036) of all Criminal Code offences reported in British Columbia during 2003. These crimes include break and enter, motor vehicle theft, other theft (such as shoplifting, theft of bicycles, theft from motor vehicles) as well as fraud and possession of stolen property. Because three out of five reported crimes are property offences, these offences have a greater impact on B.C.'s crime trends than other types of crime.

Property Crime in 2003

In 2003, police reported 287,036 property crimes, an increase of 7% when compared with the 269,147 offences reported in 2002. The 2003 property crime rate was 69.2 property crimes per 1,000 population, 6% higher than in 2002.

Most property crimes are either thefts or break and enter offences. In 2003, there were 172,398 reported thefts and 52,949 break and enter offences. These two offence categories together represented almost 80% of all property crimes and approximately 45% of total Criminal Code offences in 2003.

In 2003, 24,706 persons were charged with property crimes. Approximately 86% (21,162) of total persons charged were adults and 14%

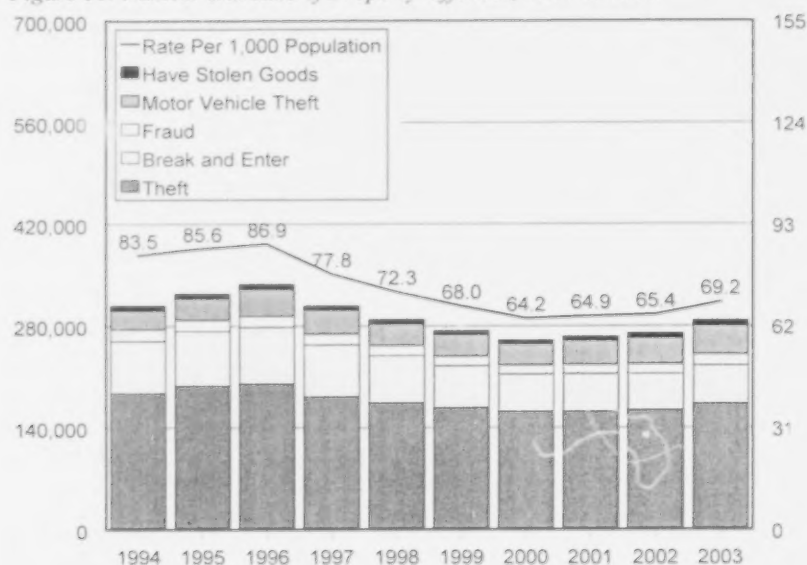

(3,544) were youths between 12 and 17 years of age. Males represented 77% (19,135) of total persons charged and females represented 23% (5,571). These percentages have remained about the same over the last ten years.

Property Crime Trends

After remaining fairly stable during the 1980s, the number of property crimes in B.C. began increasing in 1990. From 1990 to 1996, it increased an average of 4% per year, reaching a 20-year high of 336,750 offences reported in 1996. Starting in 1997, the number of property crimes decreased over the next four years, falling by an average of 6% each year. Increases have been reported in the number of property crimes in the past few years (rising 11% between 2000 and 2003). Despite these increases, the number of property crimes reported in 2003 is still 15% lower than the number reported in 1996.

The property crime rate remained relatively constant throughout the 1980s, averaging about 80 offences per 1,000 population. It rose to 90 offences per 1,000 population in 1991, peaked in 1996, and declined each subsequent year. Between 2000 and 2003, the property crime rate has increased by 8%, driving the increase in the overall crime rate.

Figure 18: Number and Rate of Property Offences, 1994 to 2003.

The number of offences cleared (solved) is low for most property crimes. Over the last ten years, clearance rates have continued to decline. In 2003, only 13% (38,686) of property crimes were solved, compared with 17% (53,345) in 1993.

The number of offences cleared (solved) is low for most property crimes. In 2003 only 13% of property crimes were cleared.

Break and Enter

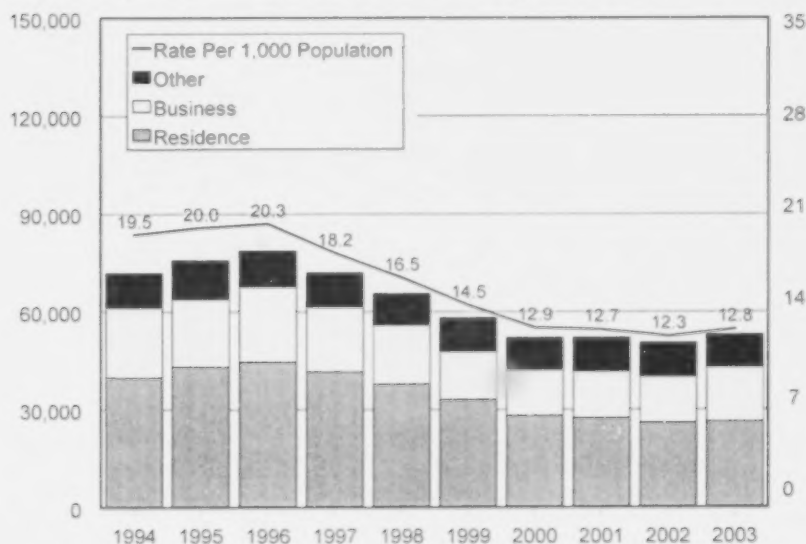

Break and enter offences are divided into three categories: residential, business, and other break and enters. Other break and enter offences include break and enter of trains, boxcars, unattached trailers or storage lockers.

Break and Enter in 2003

In 2003, police reported 52,949 break and enter offences, an increase of 2,513 offences or 5% from the 50,436 reported in 2002. The 2003 break and enter rate was 12.8 offences per 1,000 population, 4% higher than in 2002.

During 2003, 50% (26,356) of break and enter offences occurred in homes, 31% (16,608) in businesses, and 19% (9,985) in other premises. Break and enter offences accounted for 18% of all property crime and 10% of all Criminal Code offences in 2003.

Figure 19: Number and Rate of Break and Enter Offences, 1994 to 2003.

In 2003, the break and enter crime rate was 12.8, 4% higher than in 2002.

In 2003, 68% (2,620) of the 3,878 persons charged with breaking and entering were male adults, 7% (271) were female adults, 22% (870) were male youths, and the remaining 3% (117) were female youths.

Break and Enter Trends

In 1996 the number of break and enter offences reached a 20-year high of 78,604 offences. Between 1996 and 2000, the number of reported break and enter offences declined by almost 27,000 offences or 34%, and stabilized at an average of 51,000 reported offences each year between 2000 and 2002. In 2003, the number of break and enter offences rose by 5%, the first substantial increase in a decade.

The rate of break and enter offences was stable at 20 offences per 1,000 population between 1990 and 1996. From 1997 to 2000, the rate decreased an

In the spring of 1998, a joint task force to combat auto crime in British Columbia was created.

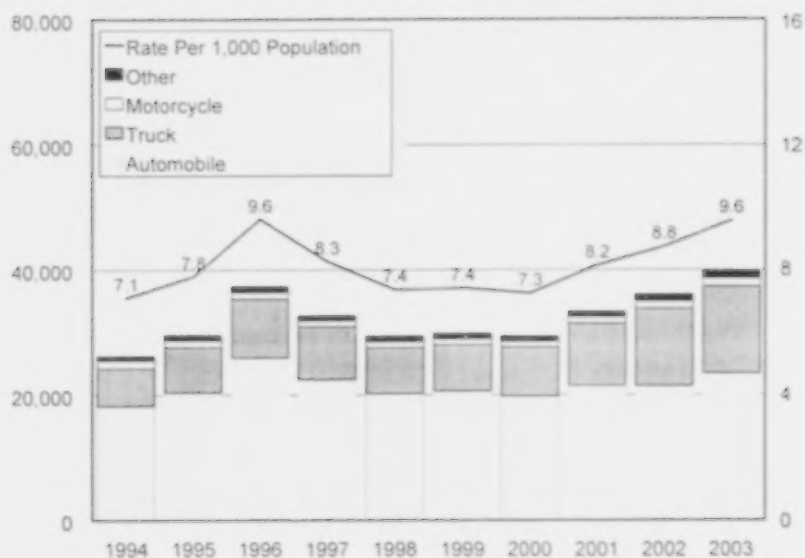

average of 10% per year, levelling off at an average of 12.6 offences per 1,000 population between 2000 and 2002. In 2003, the break and enter rate was 12.8, an increase of 4% from the 2002 rate of 12.3.

The clearance (solved) rate for break and enter offences has averaged approximately 10% over the past ten years. The clearance rate for break and enter offences during 2003 was 8% (4,306).

Motor Vehicle Theft

Motor vehicle theft data include theft or attempted theft of automobiles, trucks, motorcycles and other vehicles (such as snowmobiles, farming and industrial implements, and all terrain vehicles). Most stolen vehicles are cars or trucks.

Figure 20: Number and Rate of Motor Vehicle Thefts, 1994 to 2003.

In 1998, police officers from the RCMP and Lower Mainland municipal police departments began work on the Auto Theft Task Force (ATTF), recently renamed the Integrated Municipal Provincial Auto Crime Team (IMPACT). IMPACT's priorities include targeting offenders who are stealing vehicles for thrill seeking purposes; crimes in which vehicles are stolen and disposed of offshore or in other parts of Canada, or taken to "chop shops" for dismantling; and crimes in which vehicles are stolen and then used in the commission of further criminal offences.

Motor Vehicle Theft in 2003

There were 39,729 motor vehicle thefts reported in 2003 representing an increase of 3,730 offences or 10% from 2002. Of the 39,729 motor vehicle thefts reported in 2003, 59% (23,450) were cars, 35% (13,897) were trucks and the remaining 6% (2,382) were motorcycles or other vehicles. In 2003, the motor vehicle theft rate was 9.6 offences per 1,000 population, a 9% increase from the 2002 motor vehicle theft rate of 8.8.

Approximately 5% (1,819) of motor vehicle thefts were cleared (solved) in 2003. Of the 1,647 persons charged with motor vehicle theft in 2003, 63% (1,034) were male adults, 9% (141) were female adults, 24% (397) were male youths, and the remaining 4% (75) were female youths.

Adults accounted for 71% (1,175) of persons charged with this type of offence while youths represented 29% (472). However, since more than 95% of motor vehicle thefts in 2003 remained unsolved, generalizing about the characteristics of offenders is difficult.

Motor Vehicle Theft Trends

Between 1994 and 2003, the number of reported motor vehicle thefts increased 52% or 13,545 offences. Similar to other types of property crime, the number of motor vehicle thefts remained fairly constant during the 1980s until 1990. Between 1990 and 1996 the number of offences increased 50%, rising from 20,912 reported in 1990 to a 20-year high of 37,291 reported in 1996.

During the next four years, motor vehicle thefts levelled off and then increased again in 2001. Between 2001 and 2003, the number of reported motor vehicle thefts has increased an average of 10% annually.

The rate of motor vehicle thefts per 1,000 population remained relatively constant in 1994 and 1995, and from 1998 to 2000. Peaks in the motor vehicle theft rate occurred in 1996, 1997, and 2001 through 2003.

The clearance (solved) rate for motor vehicle theft decreased from 11% in 1994 to 5% in 2003. Although the clearance rate is low, about 95% of stolen vehicles are recovered. Many of these vehicles are damaged by the offender breaking into the vehicle, driving carelessly, or removing parts for resale.

Theft

Theft, including attempted theft, is divided into four categories: theft of bicycles, theft from motor vehicle, shoplifting and other theft. Other theft includes offences such as theft of electricity or gas, theft of data or computer software, illegal use of pay-TV descramblers and computer-aided long-distance calls. Theft accounts for three out of five property crimes and one out of three Criminal Code offences.

Every theft is classified according to the value of the goods stolen. From 1986 to 1994, thefts were divided into over and under \$1,000 categories. In 1995 these categories were revised to theft over and under \$5,000. Since 1995, the theft under \$5,000 category has represented approximately 98% of total theft offences. This section describes the data concerning theft but does not distinguish between the over and under theft categories.

Theft in 2003

In 2003, there were 172,398 thefts reported to the police. This represents a 5% increase from the 163,417 thefts reported in 2002.

*Between
1994 and 2003,
the rate of
reported motor
vehicle thefts
increased by
35%.*

Theft accounts for 60% of property crime, and 34% of all Criminal Code offences.

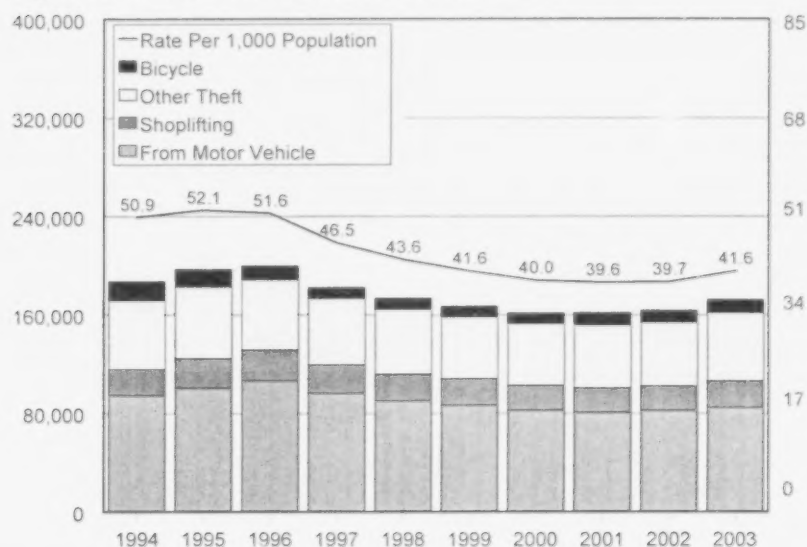

As in previous years, thefts from motor vehicles (84,696) accounted for slightly less than half of all thefts, while approximately 32% (55,227) were other thefts, 13% (21,613) were shoplifting crimes and 6% (10,862) were bicycle thefts.

In 2003, the theft rate per 1,000 population was 41.6, a 5% increase from the 2002 rate of 39.7.

Approximately 14% (23,358) of thefts were cleared (solved) in 2003, 8% (12,873) were cleared by charge and 6% (10,485) were cleared by other means.

Of the 13,705 persons charged with theft in 2003, 65% (8,911) were male adults, 23% (3,186) were female adults, 7% (1,009) were male youths and 4% (599) were female youths.

Figure 21: Number and Rate of Thefts, 1994 to 2003.

Theft Trends

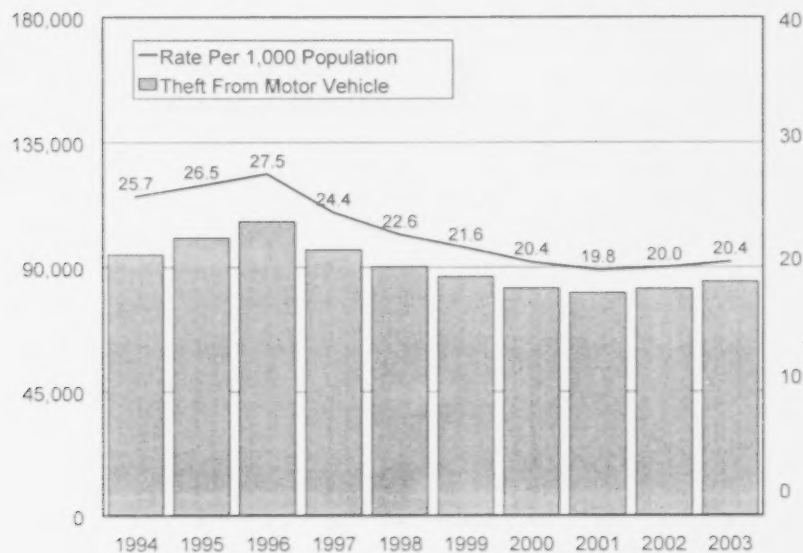

Like other property crimes, the number of thefts remained stable through the 1980s, then rose steeply in the early 1990s, peaking at almost 200,000 reported offences in 1996. From 1996 to 2000, however, the number of thefts declined an average of 5% per year. In 2000 and 2001 the number of thefts stabilized at approximately 161,500 offences. Between 2001 and 2003, however, the number of thefts increased by 7%, from 161,609 reported in 2001 to 172,398 reported in 2003.

Even though the number of reported thefts fluctuated between 1994 and 2003, the clearance (solved) rate has remained relatively stable, averaging 15%.

Between 1994 and 1999, the number of persons charged with theft remained relatively stable, averaging 19,000 per year. Between 2000 and 2003, however, the number of persons charged with theft has declined to an average of 15,000 per year.

Bicycle thefts represented 6% (10,862) of total thefts in 2003. Between 1994 and 2000 bicycle thefts declined by almost 50%, from 15,780 in 1994 to 8,531 in 2000. In subsequent years, bicycle thefts have increased by 8%, from 10,014 in 2000 to 10,862 in 2003.

Figure 22: Number and Rate of Thefts From Motor Vehicles, 1994 to 2003.

After steadily increasing in the early 1990s, the number of shoplifting offences dropped 8% between 1996 and 1997 and decreased a further 7% in 1998. Between 1998 and 2002, the number of shoplifting crimes stabilized at an average of 20,000 offences per year. In 2003, the number of shoplifting offences increased for the first time in six years, rising 9% from 19,860 offences reported in 2002 to 21,613 in 2003. Although the number of shoplifting crimes has fluctuated over the past decade, the shoplifting rate has remained relatively constant at approximately 5 offences per 1,000 population.

The number of thefts from motor vehicles climbed steadily from the late 1980s to the early 1990s, levelling between 1992 and 1994. Thefts from motor vehicles peaked in 1996 at 27 offences per 1,000 population and then decreased for the next five years. Between 2001 and 2003, however, thefts from motor vehicles increased, rising 5% from 80,626 offences reported in 2001 to 84,696 reported in 2003.

Bicycle thefts represented 6% of total thefts in 2003. Over the last 10 years, bicycle thefts declined 31%, from 15,780 in 1994 to 10,862 in 2003.

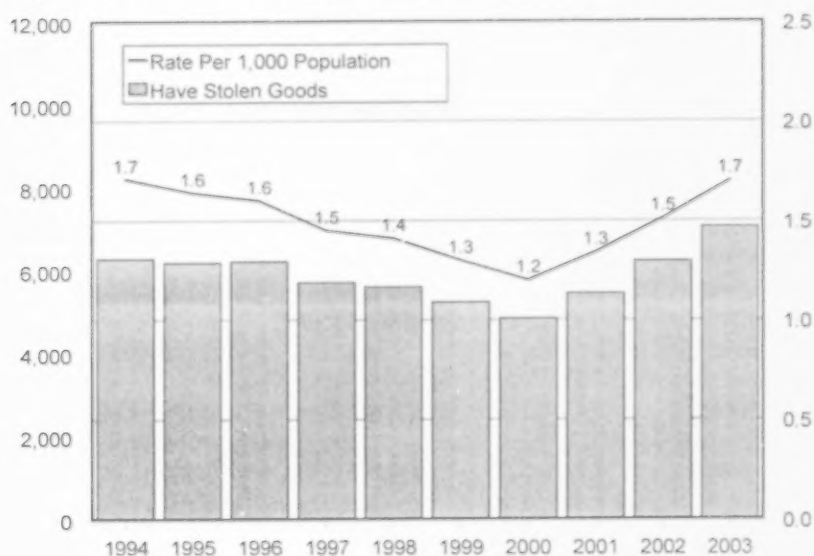

From 2000 to 2003, the number of have stolen goods offences increased an average of 13% per year.

Have Stolen Goods

A total of 7,055 "have stolen goods" (also known as possession of stolen property) offences were reported in 2003, an increase of over 800 offences or 13% from the 6,224 offences reported in 2002. The number of possession of stolen property offences remained constant during the early 1990s, rising to a 10-year high of 6,282 offences in 1994. Between 1994 and 2000, possession of stolen property offences declined by 23%. From 2000 to 2003, however, the number of offences increased an average of 13% per year.

In 2003, the rate of possession of stolen property offences per 1,000 population was 1.7, an increase of 13% from the 2002 rate of 1.5. From 1994 to 2003, the possession of stolen property rate never exceeded 2 offences per 1,000 population, averaging slightly less than 1.5 offences per 1,000 population.

Figure 23: Number and Rate of Have Stolen Goods, 1994 to 2003.

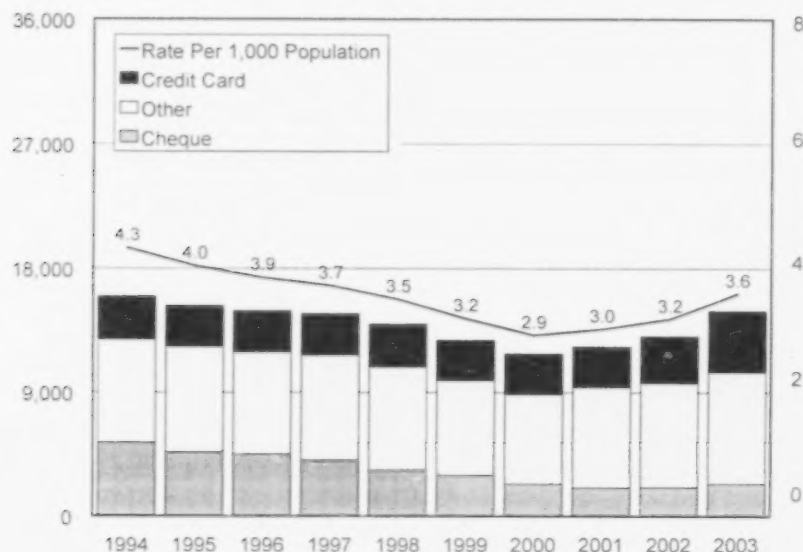

Due to the nature of these offences, clearance rates are high. In 2003, 67% (4,734) of possession of stolen property incidents were cleared, 50% (3,549) were cleared by charge and 17% (1,185) were cleared by other means. Over the last ten years, an average of 80% of possession of stolen property offences were cleared.

Of the 3,394 persons charged with possession of stolen property in 2003, 83% (2,814) were males and almost 90% (3,006) were adults.

Fraud

Fraud offences are reported under three categories: cheque, credit card and other fraud. Other fraud includes offences such as criminal breach of trust, real estate fraud, and forgery.

Figure 24: Number and Rate of Fraud Offences, 1994 to 2003.

**Males
represented
over 70%
of persons
charged with
fraud in 2003.**

There were 14,905 fraud offences reported in 2003, an increase of 14% from the 13,071 offences reported in 2002, and a 26% increase from the 11,794 reported in 2000.

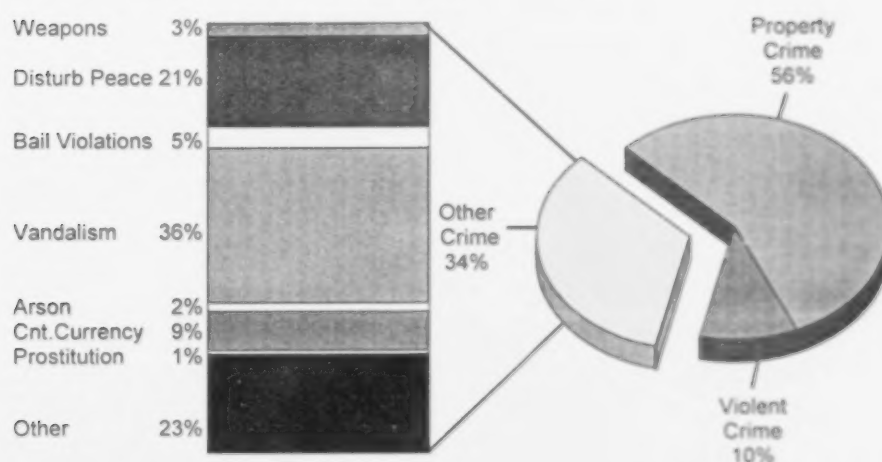

In 2003, the rate of fraud offences per 1,000 population was 3.6, an increase of 13% from the 2002 rate of 3.2. Between 1994 to 2003, the fraud rate averaged slightly less than 4 offences per 1,000 population.

Clearance rates are relatively high for this type of offence, fluctuating between 56% and 30% over the past decade. In 2003, 30% (4,469) of fraud offences were cleared (solved), 19% (2,813) were cleared by charge while 11% (1,656) were cleared by other means.

Of the 2,082 persons charged with fraud in 2003, 68% (1,417) were male adults, 28% (576) were female adults, 3% (63) were male youths and 1% (26) were female youths.

Other Crime in British Columbia

Figure 25: Other Crime by Category, 2003.

Approximately 34% (175,962) of all Criminal Code offences fall within the category of "other" crime. These other crimes include mischief and property damage (vandalism), disturbing the peace, counterfeit currency, bail violations, possession of offensive weapons, arson, prostitution, criminal harassment, and miscellaneous other Criminal Code offences (a catch-all category of offences for which specific data collection codes do not exist).

In 2003, there were 175,962 other crimes, a 9% increase from the 161,353 other offences reported in 2002.

From 1993 to 1999, the number of reported other crimes steadily declined by an average of 3% per year. Between 1999 and 2003, however, the number of reported other crimes increased by 23% from 142,957 in 1999 to 175,962 in 2003.

Of the total other crimes reported in 2003, 36% (64,007) were vandalism offences. Another 21% (36,199) were disturbing the peace offences. Together these offences represent almost 60% of all other crimes.

In 2003, the other crime rate per 1,000 population was 42.4, an increase of 8% from the 2002 other crime rate of 37.7. After decreasing an average of 4% per year between 1994 and 1999, the other crime rate increased approximately

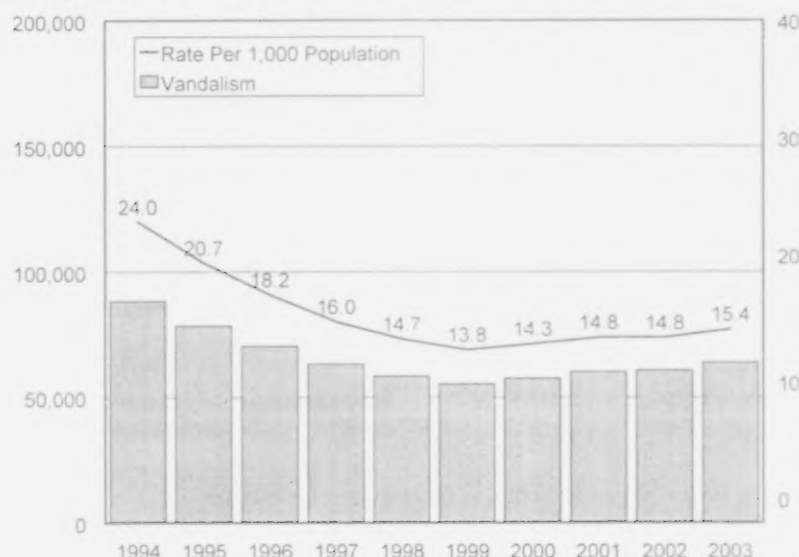

18% between 1999 to 2003. The increase in the volume of other crimes is largely being driven by substantial rises in the number of counterfeit currency and disturb the peace offences.

The clearance (solved) rate for other offences was 30% (52,807) in 2003. This represents a 6% decrease from the 2002 clearance rate of 32%. Clearance rates for other crimes are largely influenced by the volume of mischief and property damage offences which traditionally have low clearance rates.

Of the 17,998 persons charged with other crimes during 2003, 88% (15,808) were adults and 12% (2,190) were youths between 12 and 17 years. Males represented 87% (15,692) of total persons charged.

Figure 26: Number and Rate of Vandalism Offences, 1994 to 2003.

**In 2003,
64,007 mischief
and property
damage
offences were
reported, a 5%
increase from
2002.**

Mischief and Property Damage (Vandalism)

The offence of mischief and property damage is often called vandalism. It includes incidents where property is destroyed or damaged, acts where property is rendered dangerous or inoperative, or acts that render access to property denied or obstructed. Similar to thefts, mischief and property damage offences are classified according to their value. From 1986 to 1994, mischief and property damage offences were divided into over and under \$1,000 categories. In 1995, these categories were revised to over and under \$5,000. Since the 1995 revisions, most offences in this category have been reported as mischief and property damage under \$5,000.

This section describes the data concerning mischief and property damage but does not distinguish between the over and under categories.

In 2003, a total of 64,007 mischief and property damage offences were reported. This is a 5% increase from the 60,803 offences reported in 2002.

In 1994 there were 88,412 mischief and property damage crimes reported, a 10-year high. Between 1994 and 1999, the total number of reported mischief

and property damage offences steadily declined by an average of 6% per year. Between 2000 and 2003, however, the number of mischief and property damage offences reported has increased an average of slightly less than 4% each year.

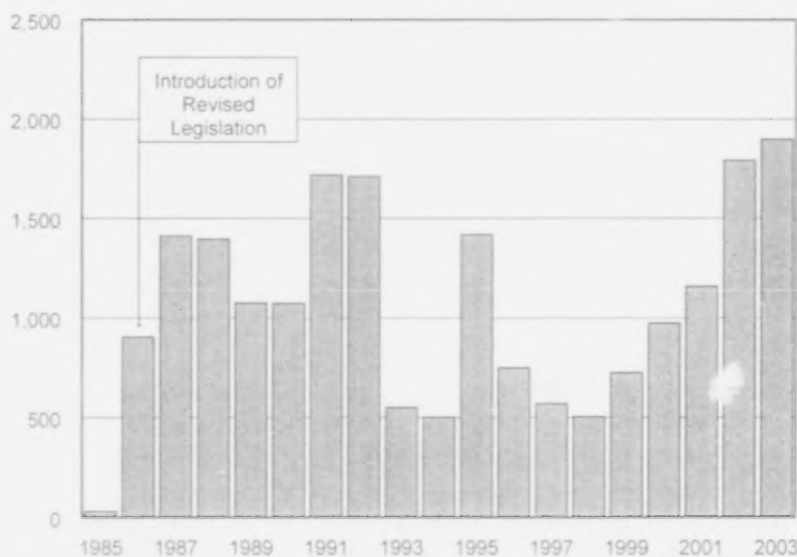

Over the past decade, the mischief and property damage rate per 1,000 population has fluctuated from a high of 24.0 offences per 1,000 population in 1994 to a low of 13.8 in 1999. In 2003, the mischief and property damage rate was 15.4, a 4% increase from the 2002 rate of 14.7 offences per 1,000 population.

Clearance rates are low for this type of offence, fluctuating between 14% and 9% over the past decade. Approximately 11% (6,897) of mischief and property damage offences were cleared (solved) in 2003, 3% (2,013) were cleared by charge and 8% (4,884) were cleared by other means.

Of the 2,160 persons charged with mischief and property damage crimes in 2003, 73% (1,576) were adults and 27% (584) were youths. Males represented almost 90% (1,902) of total persons charged.

In 2003, mischief and property damage offences represented 13% of total Criminal Code offences, a decrease from 1994, when these offences accounted for almost one-fifth of total crime.

Figure 27: Number of Prostitution Offences, 1985 to 2003

Prostitution

Prostitution offences are classified into three categories: keeping a bawdy house, procuring, and other prostitution offences. The offence of keeping a bawdy house occurs when premises are used for prostitution. Procuring, commonly called pimping, is the offence of enlisting or attracting, by any means, a person to engage in prostitution. Other prostitution offences include incidents in which a person stops or communicates with another person in a public place for the purposes of prostitution.

*Changes
in reported
prostitution
offences are
highly sensitive
to changes
in police
enforcement
practices.*

*In 2003,
four out of five
prostitution
offences were
reported in core
urban areas,
i.e., Vancouver,
Nanaimo,
Surrey, and
Prince George.*

In 2003, there were 1,899 reported prostitution offences, an increase of 6% from the 1,793 prostitution offences reported in 2002. Approximately 96% (1,822) of these crimes were for other prostitution offences, 3% (62) were for procuring and the remaining 1% (15) for keeping a bawdy house.

Four out of five prostitution offences were reported in core urban areas, i.e., Vancouver, Nanaimo, Surrey, and Prince George.

In 2003, as in previous years, the prostitution rate was less than 1 offence per 1,000 population. From 1994 to 2003, the prostitution rate has fluctuated, ranging from a high of 0.46 in 2003 to a low of 0.13 in 1998.

Traditionally, clearance rates for prostitution offences are high. Over the past decade, an average of 75% of prostitution offences have been cleared (solved).

In 2003, 361 persons were charged with prostitution offences, 6% more than in 2002. Male adults accounted for 45% (164) of persons charged, while female adults accounted for 50% (180). Youths represented the remaining 5% (17).

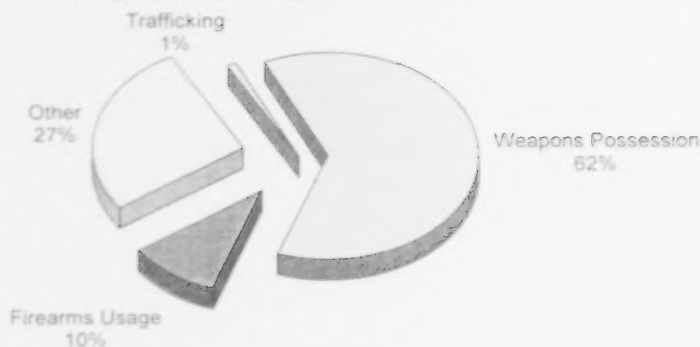

With the introduction of Bill C-49 (covering public communication for the purposes of prostitution) in 1986, the number of prostitution offences increased substantially over previous years. The number of offences peaked in 1991 and 1992, when 1,700 offences were reported in each of these years, and then declined to a low of 503 offences reported in 1994. In 1995, the number of prostitution offences more than doubled compared with 1994, but then decreased by 47% in 1996, and decreased by an additional 33% between 1996 and 1998. Between 1999 and 2003, however, the number of prostitution offences has steadily increased each year. It is important to stress that changes in prostitution offences are highly sensitive to changes in police enforcement practices.

Offensive Weapons

In 1998, the federal Firearms Act was proclaimed. The Act mandated the licensing of all gun owners by January 1, 2001 and the registration of all guns by January 1, 2003. The firearms registration requirements of the legislation were intended to provide a process through which illegal firearms could be identified and tracked. In addition, the Act set out licensing requirements for all firearms, including enhanced screening procedures, spousal notification, and safety training.

As a reflection of legislative changes, the offence categories for weapons have been modified. The new categories covered firearms usage, weapons possession, trafficking import/export and other weapons offences. Until 1999, offensive weapons crimes were divided into four offence categories: explosives, prohibited weapons, restricted weapons and other weapon offences. The revised categories are not comparable with the previous offence categories.

Figure 28: Percentage of Weapons Offences, 2003.

In 2003, there were 4,450 weapons offences reported, an increase of 6% from the 4,180 reported in 2002. Of these offences, 63% (2,797) were for weapons possession and 27% (1,209) were for "other" weapons offences. The remaining 10% (444) were related to firearms usage and weapons trafficking. Although the number of weapons offences has increased an average of 7% per year from 1999 onward, the weapons rate has never exceeded 1 offence per 1,000 population.

Clearance rates are relatively high for this type of offence. In 2003, 63% (2,833) weapons offences were cleared; 32% (1,437) by charge and 31% (1,396) by other means.

Of the 1,410 persons charged with weapons offences in 2003, 80% (1,123) were adult males, 6% (40) were adult females, 13% (178) were male youths, and 1% (19) were female youths.

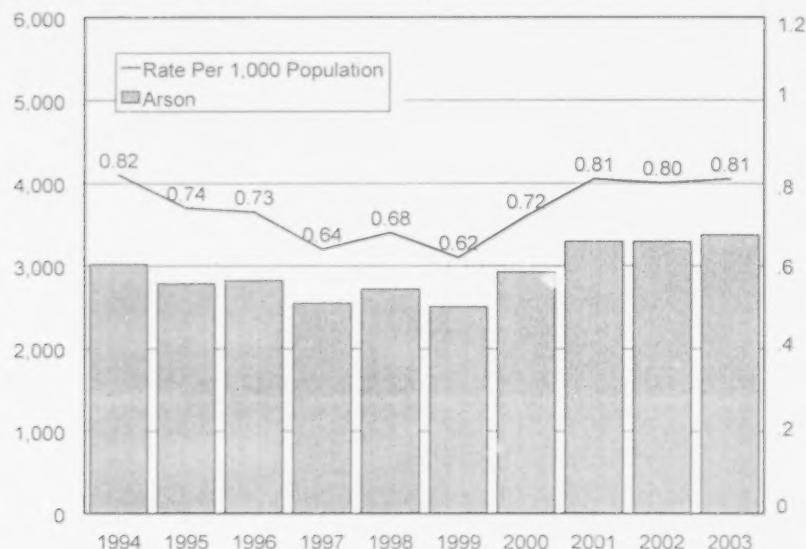

*In 2003,
there were
4,450 weapons
offences
reported, an
increase of 6%
from 2002.*

**In 2003,
3,373 arson
offences were
reported,
a less than 3%
increase from
2002.**

Arson

Before 1990, arson was more narrowly defined than it is today. With the proclamation of Bill C-53 in July 1990, the definition of arson was expanded and the penalties became more serious. Besides causing damage to specific types of property, arson now includes wilful disregard for the lives and safety of others and negligent conduct that results in fires or explosions. It also criminalizes the possession of flammable or incendiary materials.

Figure 29: Number and Rate of Arson Offences, 1994 to 2003.

Mischief arson, such as setting fire to abandoned cars or waste receptacles, was previously reported as mischief and property damage. Under the new legislation, these offences are now reported as arson. This resulted in a significant increase in the number of arson offences recorded since 1990.

Between 1986 and 1990, the number of arson offences reported remained relatively stable, averaging 2,875 offences per year. Between 1997 and 2000, the number of arson offences fluctuated from a high of 2,924 to a low of 2,502. Between 2001 and 2003, the number of arson offences increased by 2%.

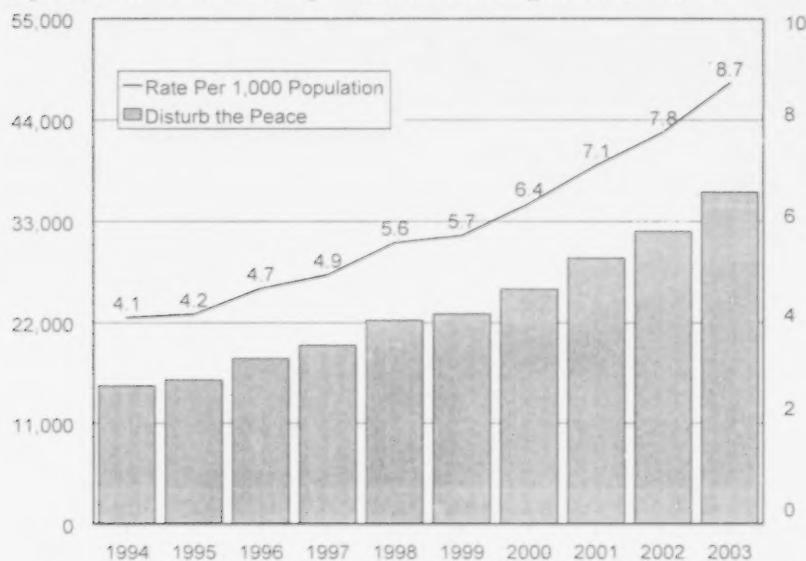

Before 1991, approximately 20% of arson offences were cleared. Since that time, the average clearance rate has dropped to approximately 12%. This decrease in clearance rates is largely due to the wider definition of arson.

Of the 165 persons charged with arson offences in 2003, 90% (150) were males, and 47% (78) were youths.

Disturbing the Peace

Disturbing the peace is defined as causing a disturbance in or near a public place. A "disturbance" includes behaviour such as fighting, making loud noise, using obscene language, and being drunk and disorderly.

Figure 30: Number and Rate of Disturb the Peace Offences, 1994 to 2003.

Police often deal with incidents of disturbing the peace through the municipal and provincial ticketing process.

Rather than proceeding under the Criminal Code, police often deal with incidents of disturbing the peace as offences under provincial statutes or municipal bylaws. This allows police to address these crimes through the municipal and provincial ticketing process.

In 2003, there were 36,199 Criminal Code disturbing the peace offences reported, representing an increase of 13% from the 31,932 reported in 2002.

The number of disturbing the peace offences has fluctuated during the past twenty years. Between 1984 and 1995, the number of reported offences remained stable, averaging approximately 15,000 offences per year. During the next four years, however, the number of disturb the peace offences reported rose 46%, from 15,723 in 1995 to 22,941 in 1999. A further increase of 40% occurred between 2000 and 2003.

The rate per 1,000 population for disturbing the peace offences remained relatively constant between 1994 and 1997 never exceeding 5 offences per 1,000 population. During the last six years, the rate has risen from 5.6 in 1998 to a ten year high of 8.7 in 2003.

In 2003, 41% (14,792) of disturbing the peace offences were cleared. Over the past decade, the clearance rate for disturbing the peace offences has averaged 57% each year.

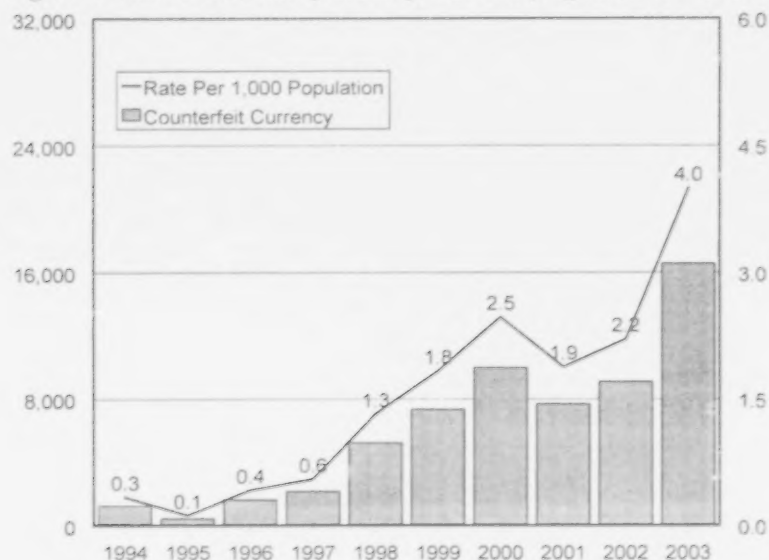

Of the 700 persons charged with disturbing the peace offences in 2003, 84% (591) were adults and 16% (109) were youths. Males represented 86% (603) of persons charged with disturbing the peace offences.

Expanded detection training and bank note security are partially responsible for the rise in counterfeit currency offences.

Counterfeit Currency

The number of reported counterfeit currency offences has increased substantially over the past decade, rising from 1,252 reported in 1994 to 16,570 in 2003. While an increase in counterfeiting activity has occurred in the province, the rise in these offences can also be partially attributed to an expansion of detection training and bank note security, as well as enhancements in police enforcement practices.

Figure 31: Number and Rate of Counterfeit Currency Offences, 1994 to 2003.

A total of 16,570 counterfeit currency offences were reported in 2003, an increase of 7,472 offences or 82% from the 9,098 offences reported in 2002, and a 66% increase from the 9,972 offences reported in 2000. Counterfeit currency crimes accounted for 9% of all other crimes and 3% of all Criminal Code offences in 2003.

In 2003, the rate of counterfeit currency offences per 1,000 population was 4.0, an increase of 81% from the 2002 rate of 2.2. Between 1994 and 1999, the counterfeit currency rate never exceeded 2 offences per 1,000 population. From 2000 to 2003, the counterfeit currency rate has averaged 2.6 offences per 1,000 population per year.

Clearance rates are low for this type of offence. In 2003, slightly more than 1% of counterfeit currency offences were cleared; the majority of which were cleared by charge.

Of the 146 persons charged with counterfeit currency offences in 2003, 74% (108) were male adults, 20% (29) were female adults with the remaining 6% (9) being male youths.

Criminal Harassment

In 1993, the Criminal Code was amended to include the offence of criminal harassment. Criminal harassment, more commonly known as stalking, prohibits harassing and intimidating conduct that causes a person to fear for his or her safety or the safety of anyone known to him or her.

Criminal harassment is a distinct form of criminal activity involving a series of actions as opposed to a single isolated event. When these actions are considered individually, they often do not constitute a crime (for example, sending notes or flowers). It is when these activities instill fear of injury that they represent a pattern of behaviour that is considered criminal.

In 2003, 4,110 criminal harassment offences were reported in B.C., a 3% decrease from the 4,234 reported in 2002. Over 70% (2,929) of criminal harassment charges were cleared (solved) with 2,358 persons charged. Males represented almost 90% (2,091) of persons charged with criminal harassment offences.

Criminal Harassment Survey Results

Police Services Division conducted a survey of criminal harassment incidents reported to police during 1995 and 1996. The survey revealed the following characteristics of a "typical" criminal harassment incident in B.C.:

- In eight out of ten incidents, the victim is female and the accused is male.
- Both the victim and the accused are likely between the ages of 25 and 45.
- In seven out of ten incidents, the harassment occurs at either the victim's home or the victim's place of work.
- In nearly half of the incidents there is an intimate relationship between the victim and the accused. In nine of ten incidents where an intimate relationship exists, the offender is an ex-boyfriend or an ex-spouse of the victim.
- About two-thirds of the incidents are cleared (solved). One-third of the incidents are cleared by charge while another third are cleared by other means.
- More than half of the accused charged with criminal harassment have prior criminal records. Of those accused persons with prior criminal records, half have a record for violent offences and one in four have a record for weapons offences.

Miscellaneous Other Criminal Code Offences

Those Criminal Code offences that do not have specific data collection codes are grouped in the category of "miscellaneous other" offences.

In 2003, there were 36,741 miscellaneous other Criminal Code offences reported, representing a 2% decrease from the 37,376 reported in 2002. Approximately 44% (16,178) of miscellaneous other offences were cleared in 2003, 22% (8,133) were cleared by charge and 22% (8,045) were cleared

by other means. A total of 6,202 persons were charged with these types of offences, adults accounted for 94% (5,806) of persons charged.

Police Services Division conducted a survey of miscellaneous other offences in 1995 to determine the types of crimes that fall into this category. Results showed that 55% of the offences were uttering threats and 29% were harassing or indecent phone calls. Applications for peace bonds or restraining orders were the next largest category at 4%. The remaining 12% were various offences, including breach of peace, cruelty to animals, unlawfully in dwelling house, and possession of break-in instruments.

Drug Crime in British Columbia

Figure 32: Drug Crime by Category, 2003.

Prior to 1997, offences involving drugs fell under two federal statutes: the Narcotic Control Act (NCA) and the Food and Drugs Act (FDA). The Narcotic Control Act dealt with illicit drugs and the Food and Drugs Act covered controlled and restricted drugs. On May 14, 1997, the NCA and Parts III and IV of the FDA were repealed and replaced by the Controlled Drugs and Substances Act (CDSA). This consolidation of drug control legislation allowed for the control of precursors (substances used to make psychoactive substances), and dealt with the forfeiture of property and goods related to illegal drug activities.

Before the proclamation of the CDSA, drug offences were reported on the basis of six drug categories: heroin, cocaine, cannabis, other drugs, controlled drugs and restricted drugs. Under the CDSA there are four categories of drug offences: heroin, cocaine, cannabis and other CDSA drugs. Generally speaking, the other CDSA drug category contains those drugs previously included in the other drugs and controlled and restricted categories. The consolidation of illicit drugs into the new categories provided by the CDSA did not commence until mid-1997. As such, 1997 was a transition year in the reporting of drug offences, and 1998 represents the first complete calendar year in the reporting of illicit drug offences under the CDSA.

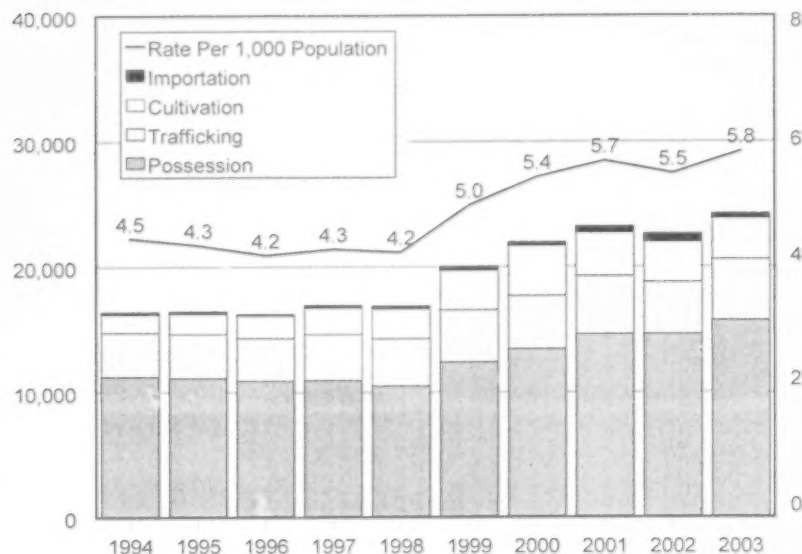

In 1997, the Narcotic Control Act and Parts III and IV of the Food and Drugs Act were repealed and replaced by the Controlled Drugs and Substances Act.

Drug Crime in 2003

The total number of drug crimes reported in 2003 was 24,199, a 7% increase from the 22,601 reported in 2001. This represents a drug crime rate of 5.8 offences per 1,000 population. During the past decade the number of reported drug offences has increased by almost 50%, from 16,387 in 1994 to 24,199 in 2003.

It is important to note that changes in drug offence data are highly sensitive to police enforcement practices. For example, decisions by policing organizations to investigate marijuana grow operations are likely to result in an increase in the number of reported cultivation offences.

Figure 33: Number and Rate of Drug Crimes, 1994 to 2003.

In 2003, 72% (17,338) of drug offences involved cannabis. A further 20% (4,732) involved cocaine. Of the remaining drug offences, 7% (1,713) involved other drugs and 1% (416) involved heroin (considered the most serious drug offence).

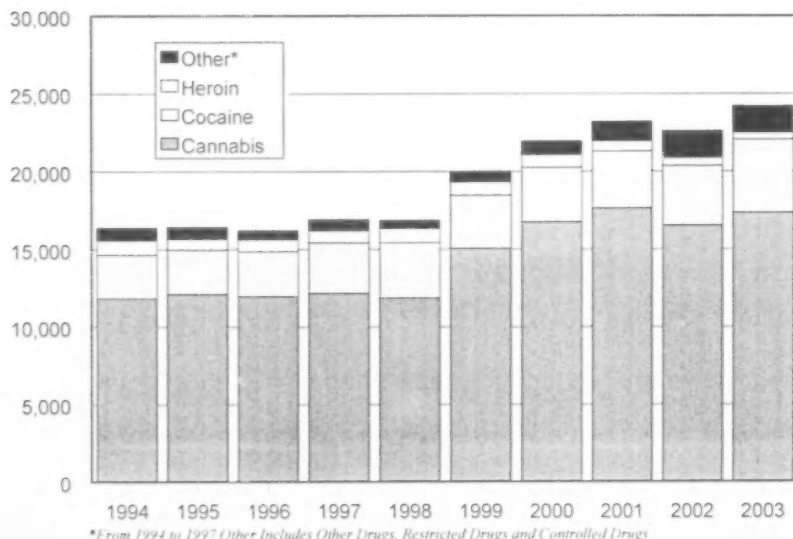

Drug crimes include the offences of possession, trafficking, importation and cultivation. In 2003, possession offences represented 65% (15,711) of all drug offences, while 20% (4,862) were for trafficking, 14% (3,274) for cultivation and 1% (352) for importation. These proportions have remained relatively stable during the past decade, although cannabis cultivation offences increased almost 126% from 1,447 offences in 1994 to 3,274 offences in 2003.

In 2003, 70% (17,017) of drug offences were cleared. Over the last ten years the percentage of drug offences cleared has fluctuated, ranging from a high of 81% in 1995, to a low of 70% in 2003. Of all drug offences, 24% (5,772) were cleared by charge in 2002 and 46% (11,245) were cleared by other means. Since the early 1990s, the proportion of incidents cleared by

charge has decreased, while the proportion of incidents cleared by other means has increased.

The number of drug offences cleared by charge is relatively low considering the nature of the crime. Lack of verification of ownership of seized or found drugs is the major contributing factor to low charge rates.

Figure 34: Drug Crimes by Type of Drug, 1994 to 2003.

Drug offence data are sensitive to police enforcement practices.

Of the 8,457 people charged with drug offences in 2003, 54% (4,528) were charged with trafficking offences, 31% (2,618) were charged with possession offences, 13% (1,122) with cultivation offences and 2% (189) were charged with importation offences.

In 2003, adults accounted for 93% (7,890) of persons charged with drug offences while youths accounted for 7% (567). Males represented 82% (6,928) of persons charged while the remaining 18% (1,529) were females.

Cannabis

Cannabis includes hashish or marijuana in either powdered, leaf, liquid or resin form. Offences involving cannabis represented approximately three-quarters of all drug offences in 2003, and have comprised most drug offences in B.C. over the past decade.

In 2003, there were 17,338 cannabis offences representing a 5% increase from the 16,532 offences reported in 2002. Between 1994 and 2003, the number of cannabis offences increased by 46%, from 11,838 in 1994 to 17,338 in 2003. In 2003, the cannabis rate was four offences per 1,000 population.

In 2003, possession represented 70% (12,029) of cannabis offences and cultivation represented 18% (3,274) while trafficking (1,950) and importation (85) represented 11% and 1% respectively.

***In 2003,
72% of drug
offences
involved
cannabis.***

Although the proportion of possession and importation offences has remained relatively stable in the last ten years, the proportion of trafficking and cultivation offences has fluctuated. Trafficking offences accounted for a high of 12% of all cannabis offences in 2001, and a low of 9% in 1998. In 1994, cultivation offences represented 12% of cannabis offences compared with almost 20% in 2003.

In 2003, 70% (12,069) of cannabis offences were cleared, 16% (2,745) by charge and 54% (9,324) by other means.

Of the 4,616 persons charged with cannabis offences in 2003, 40% (1,839) were charged with trafficking offences, 35% (1,600) were charged with possession offences, 24% (1,122) with cultivation offences and 1% (55) with importation offences. Adults accounted for over 90% (4,209) of persons charged while males accounted for 83% (3,838) of persons charged.

Cocaine

The number of cocaine offences reported has increased 68% since 1994. In 2003, 4,732 offences were reported, a 23% increase from the 3,836 offences reported in 2002. Between 1994 and 2002, the cocaine rate never exceeded 1 offence per 1,000 population. In 2003, however, the cocaine rate was 1.14, a 50% increase from the 1994 rate of .76.

In 2003, trafficking accounted for 50% (2,383) of all cocaine offences, possession accounted for 49% (2,303), and importation accounted for 1% (46).

In 2003, 74% (3,532) of cocaine offences were cleared, 49% (2,338) by charge, and 25% (1,194) by other means.

Of the 2,980 persons charged with cocaine offences in 2003, 74% (2,225) were charged with trafficking offences, 24% (702) with possession offences and less than 2% (59) with importation offences. Adults accounted for 96% (2,873) of persons charged, and males accounted for 80% (2,379).

Heroin

In the late 1980s, the number of heroin offences was relatively stable at approximately 280 offences each year. Between 1992 and 1994, the number of heroin offences almost doubled, reaching a high of 925 offences in 1994. From 1995 to 2000, however, the number of heroin offences decreased by 15% to an average of 800 offences per year. In 2003, there were 416 heroin offences reported, a 16% decrease from the 494 reported in 2002 and an almost 50% decrease from the 796 reported in 2000.

In 2003, possession accounted for 64% (267) of all heroin offences, trafficking accounted for 31% (130), and importation accounted for the

remaining 5% (19). In the past ten years, the heroin rate has never exceeded one offence per 1,000 population.

In 2003, 85% (352) of heroin offences were cleared, 52% (216) by charge and 33% (136) by other means.

Of the 290 persons charged with heroin offences in 2003, 65% (188) were charged with trafficking offences, 26% (77) with possession offences, and 9% (25) with importation offences. Adults accounted for 96% (278) of persons charged, and 85% (246) were males.

Other CDSA Drugs

Prior to 1997, the "other drugs" category comprised all narcotics (with the exclusion of heroin, cocaine, and cannabis) described by the Narcotic Control Act, in addition to illicit drugs or substances described in Schedule F of the Food and Drugs Act. These included, for example, derivatives of the opium poppy (such as codeine, morphine and opium), antibiotics, anticoagulants, antidepressants and anabolic steroids. Beginning in mid-1997, however, the other drug category was renamed the "other CDSA drug" category and included the above noted substances along with many of the drugs previously included in the controlled and restricted drugs categories.

In 2003, there were 1,713 other drug offences reported, representing a 1% decrease from the 1,739 reported in 2002. The number of offences in this category has fluctuated considerably over the last ten years. The total number of other drug offences reached a low of 194 offences in 1995 and peaked at a high of 1,739 offences reported in 2002. Despite this increase, the other drug offence rate has never exceeded one offence per 1,000 population.

In 2003, possession accounted for 65% (1,112) of other CDSA drug offences, trafficking accounted for 23% (399) and importation accounted for 12% (202).

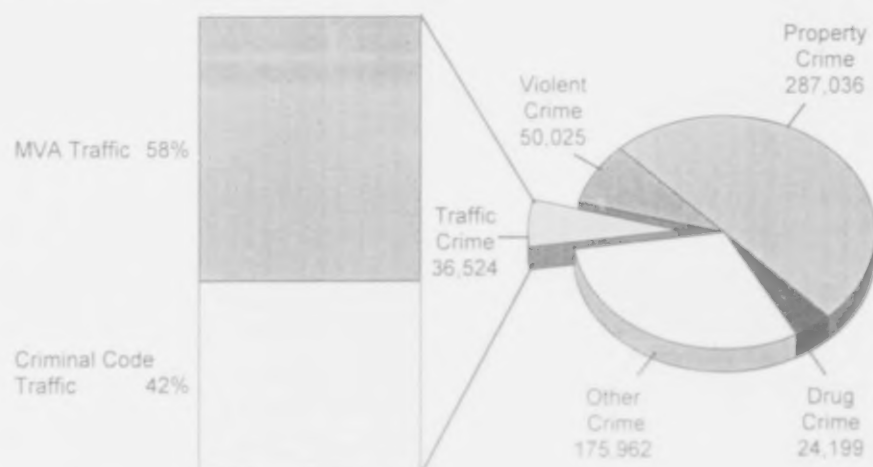

In 2003, 62% (1,064) of other drug offences were cleared, 28% (473) by charge and 34% (591) by other means.

Of the 565 persons charged with other drug offences in 2003, 49% (276) were charged with trafficking offences, 42% (239) were charged with possession offences and 9% (50) were charged with importation offences. Adults accounted for 94% (530) of persons charged and 82% (465) were males.

Traffic Crime in British Columbia

Figure 35: Traffic Crime by Category, 2003.

In British Columbia, police report traffic offences under either the federal Criminal Code or the provincial Motor Vehicle Act. A total of 36,524 traffic offences were reported in 2003, 42% (15,418) were Criminal Code offences and the remaining 58% (21,106) were offences under the Motor Vehicle Act.

Criminal Code: Traffic

Criminal Code traffic offences are collected under the categories of impaired or dangerous operation of a vehicle (including motor vehicles, boats, vessels, and aircraft), failure to stop at the scene of an accident, driving a vehicle while prohibited from doing so, and failing or refusing to provide either a breath or blood sample upon demand by police.

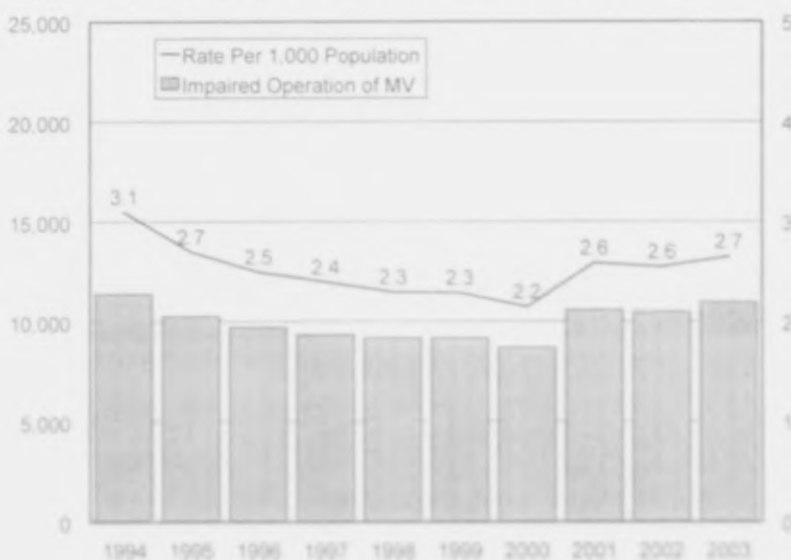

In 2003, there were 15,418 Criminal Code traffic offences reported by the police, a 2% increase from the 15,156 offences reported in 2002. Between 1994 and 2003, the number of Criminal Code traffic offences reported by the police has declined by 19%.

Of the 15,418 Criminal Code traffic offences reported in 2003, 71% (10,974) were reported in the impaired operation of a motor vehicle categories. Over 99% (10,883) of these were for impaired operation or driving with a blood alcohol level over .08%, and slightly less than 1% were for impaired operation causing bodily harm (73) or impaired operation causing death (16).

Increased police enforcement and initiatives such as anti-drinking and driving campaigns are thought to have combined to reduce the number of impaired operation of motor vehicle offences.

Although impaired operation of a vehicle has historically represented the greatest proportion of Criminal Code traffic offences, 60% in 1994 and 71% in 2003, the frequency of this type of offence has decreased 4% over the past decade. Increased police enforcement, anti-drinking and driving campaigns, societal pressure, and joint police and government safety initiatives are thought to have combined to reduce the number of these offences. However, it should be noted that as the number of reported Criminal Code impaired operation crimes has declined, the number of administrative prohibitions (24-hour roadside suspensions) has increased. One possible reason for the diverging trend is that a driving prohibition under provincial legislation can be issued on the suspicion by a peace officer that a person's ability to drive is impaired. In order to lay charges under the Criminal Code, on the other hand, clinically based evidence such as blood or breath samples is normally required.

Figure 36: Number of Impaired Operation Offences, 1994 to 2003.

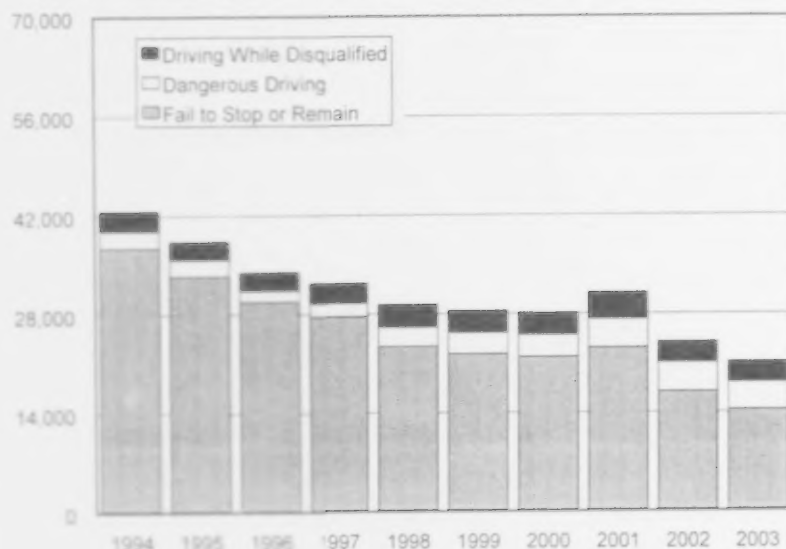

Of the remaining 4,444 Criminal Code traffic offences reported in 2003, failure to stop or remain at an accident scene accounted for 10% (1,543) of total offences reported, dangerous operation of a motor vehicle accounted for 8% (1,240), driving a motor vehicle while prohibited accounted for 6% (855), failure to provide a breath or blood sample accounted for 4% (657), and dangerous and impaired operation of a boat, vessel or aircraft accounted for 1% (149).

Provincial Statutes: Traffic

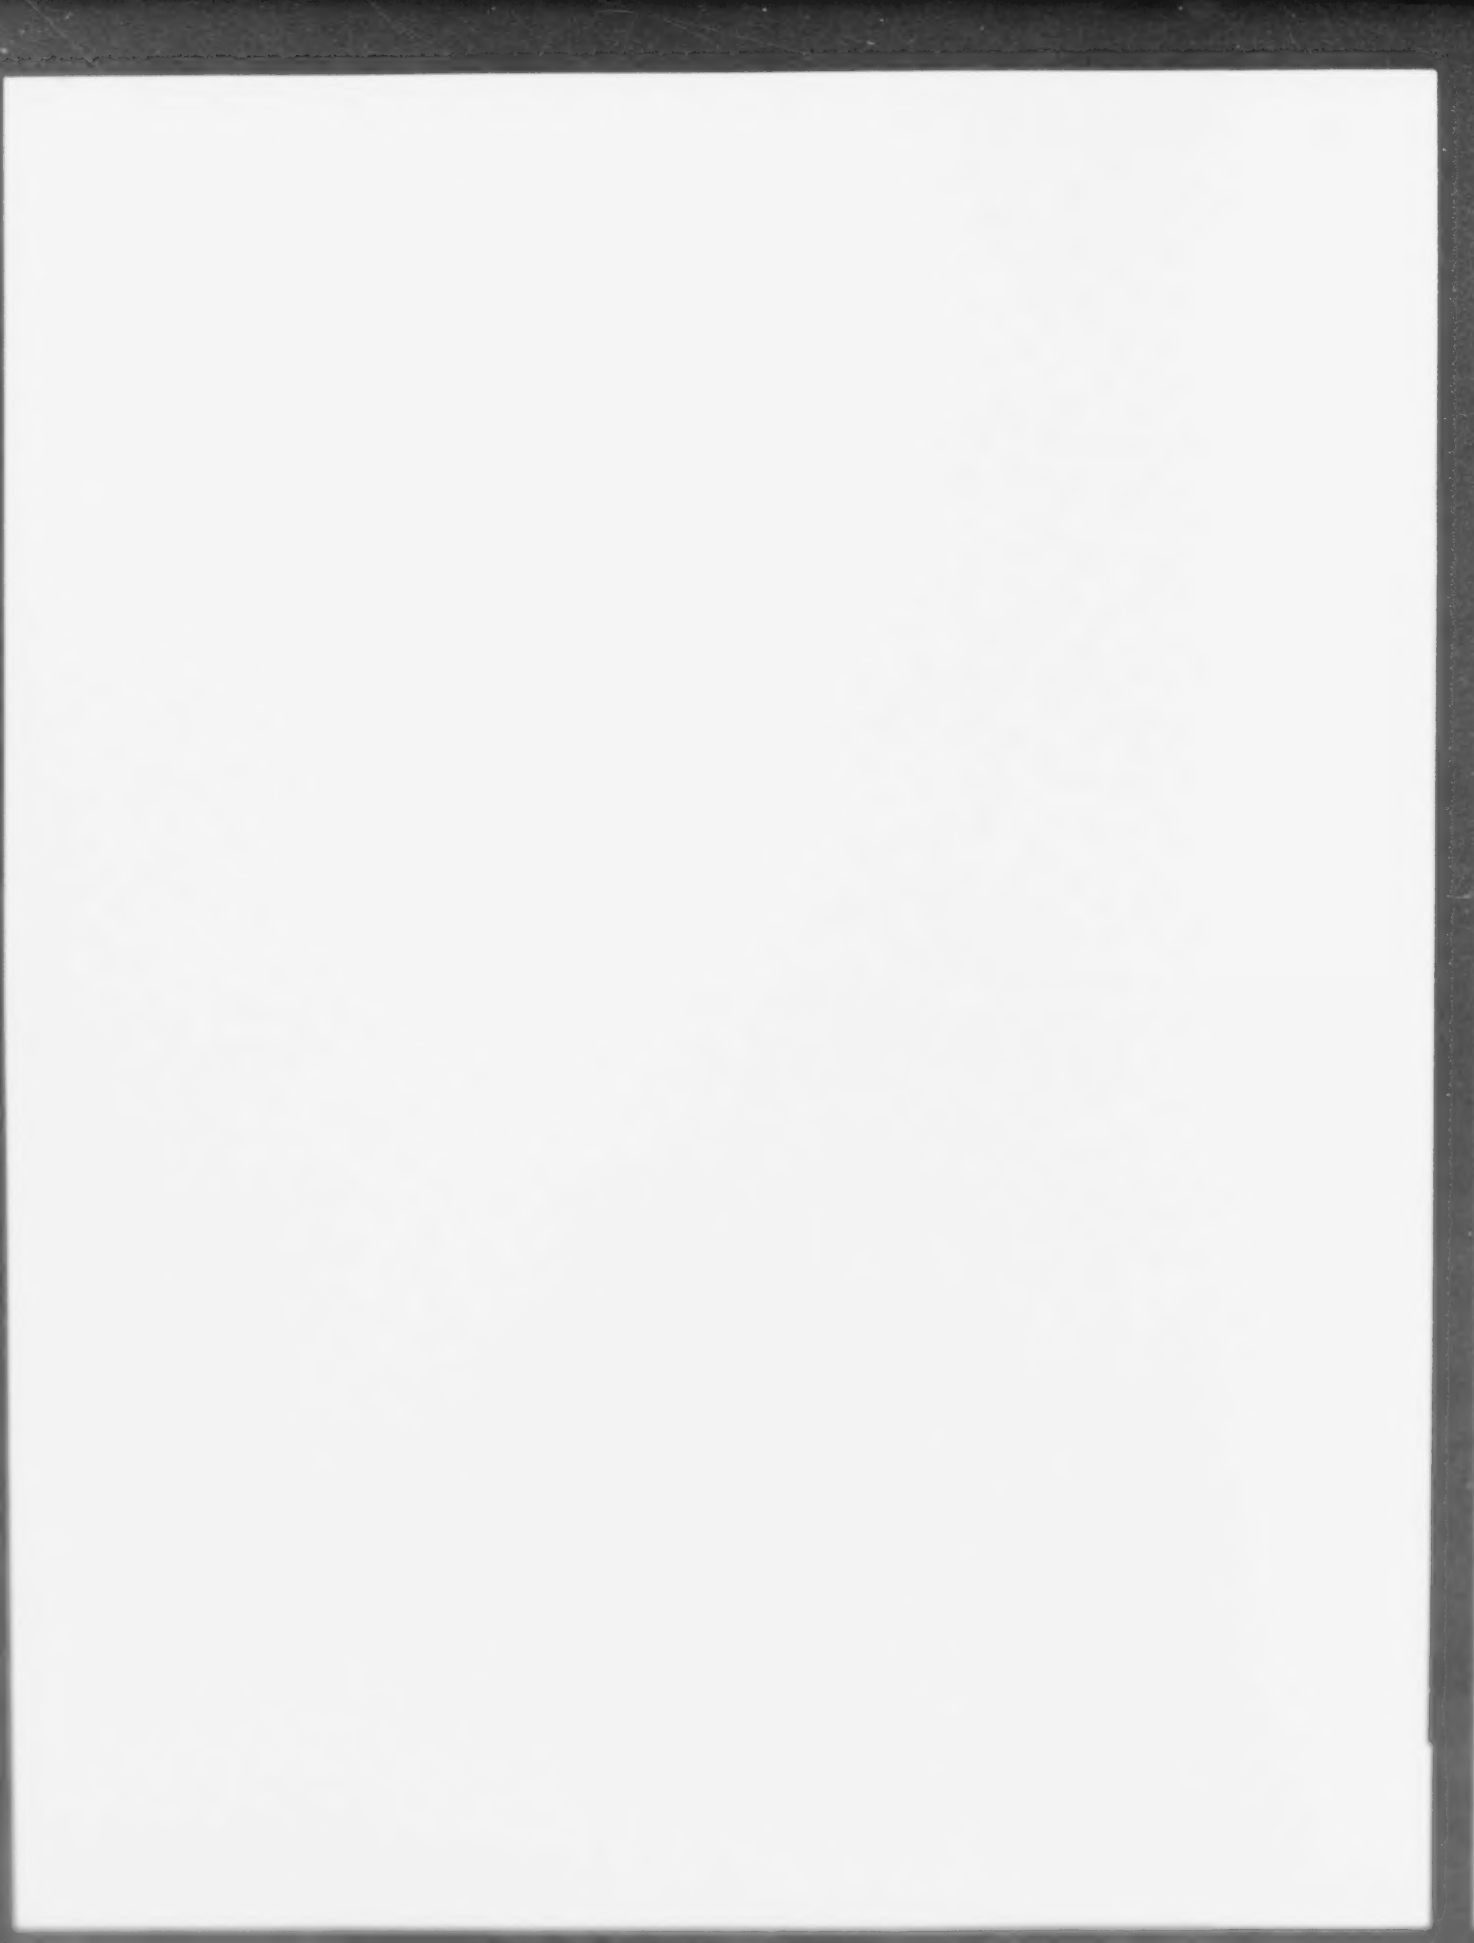

Under the UCR Survey, only three categories of traffic offences covered by the provincial Motor Vehicle Act are counted. These include the following: failure to stop or remain at the scene of an accident (hit and run), dangerous driving, and driving while licence suspended.

Figure 37: Number of Provincial Statute Traffic Offences, 1994 to 2003.

In 2003, there were 21,106 Motor Vehicle Act traffic offences reported, 2,862 or 12% less than in 2002. Of these offences, 68% (14,336) were for fail to stop or remain (hit and run), 18% (3,851) were for driving without due care (dangerous driving) and 14% (2,919) were for driving with a suspended licence.

*In 2003,

B.C. Police Academy, OCABC), as reported to Police Services for calendar year 2003.
- ³ The Esquimalt and Victoria police departments amalgamated on January 1, 2003.
- ⁴ Total Costs ref
For the municipalities policed by the RCMP, Total Costs include the municipality's share of RCMP contract costs plus those costs borne 100% by the municipality which are over and above the contract costs such as support staff and accommodation. If a municipality included the costs of Bylaw enforcement or victim services programs in their actual expenditures these have been excluded from Total Costs. Total Costs also do not include f
exists between jurisdictions with respect to the cost items that are included in their policing budgets.

APPENDIX A-1 DATA QUALIFIERS

- Canada Census occurred in 2001. The population figures for 2003 contained in this report are estimated based on 2001 Census data. The population in RCMP is in. One municipality, Sooke, exceeded 5,000 population in the 2001 Census and became responsible for its policing services in April 2002. One municipality, Salmon Arm, exceeded 15,000 population in the 2001 Census and moved from the 5,000 to 15,000 category to the over 15,000 population category. One municipality, Prince Rupert, moved from the over 15,000 category to the 5,000 to 15,000 category and one municipality, Port Hardy, moved below the 5,000 to 15,000 category and is no longer responsible for its policing services. It has reverted to a solely Provincial policing jurisdiction.
- Population figures reflect the "resident" or "late night" population of a jurisdiction or municipality, rather than the number of people who spend some part of the residents", i.e.,
- Authorized police strength is based on the authorized police strength as of December 31, 2003. The authorized strength of the RCMP is obtained from RCMP "E" Division Headquarters. The authorized strength of the independent jurisdictions is collected annually from each department.
- The offence data compiled in this report have been reported by the police at the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences, where one incident with multiple victims is scored as one offence, police record one offence for every victim of a "violent" crime, e.g. homicide, attempted murder, sexual and non-sexual assault, and abduction. Total UCR Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to be crimes. Information is sworn or constructive obtained.
- UCR Offences include Criminal Code-Property, Person and Other offences. Criminal Code-Property offences include break and enter, motor vehicle theft, theft over and over than \$5000, fraud, and possession of stolen property. Criminal Code-Person offences include violent crimes such as homicide, attempted murder, sexual and non-sexual assaults, robbery and abduction. Criminal Code-Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, lost weapons, failure to provide aid and mischief and property damage (vandalism). Criminal Code-Traffic offences are not included in UCR offences.

APPENDIX A-1 DATA QUALIFIERS

6. Crime rate is defined as the number of Criminal Code offences (Excluding Traffic) per 1,000 population. It is based on the number of crimes occurring with "part time" residents in which a
7. Many municipalities exhibit what is commonly referred to as the "core city syndrome". These cities are surrounded by urban or unincorporated areas which have substantial residential populations. As a result, the crime rates would be lower for the combined populated areas than for those municipalities by themselves.
8. Criminal Code Case Burden is defined as the number of Criminal Code offences (Excluding Traffic) per authorized police strength. The total number of Criminal Code offences and the authorized police strength as of December 31, 2003 are used to calculate case burden.
9. Comparisons between the case burdens of independent municipal forces and RCMP municipal forces may be erroneous due to differences in the organizational structures of the RCMP and independent municipal forces. The RCMP municipal forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.
10. Population force. A number of other factors, such as size, accessibility of the area to be policed, and traffic volume are also taken into consideration. Case burdens and crime rates also do not reflect the time spent by police providing general assistance to the public, or participating in crime prevention programs, or enforcing traffic laws.
11. Summary data and statistics for the independent and RCMP municipal Forces are shown as the last line of each Table. The Criminal Code case burden

APPENDIX A-2 FOOTNOTES

- ¹ Municipalities policed by the RCMP are categorized into two groups according to their population: 5,000 to 15,000 or over 15,000 population. Population figures shown are estimates based on the results of the 2001 Canada Census.
- ² The unincorporated areas of the province make no direct contribution towards their policing services. However, the rural property tax levy collected from residents serves to offset, to some degree, the cost of policing rural communities.
- ³ The three First Nations Administered Police Services – Kitasoo-XaiXais, St'at'imx, and Dłédaht – were opened in 1999. Each of these police services are autonomous and independent of the RCMP. Their costs are shared jointly between the Federal (52%) and Provincial (48%) governments.

APPENDIX A-2 DATA QUALIFIERS

1. All expenditure figures shown above for the Federal and Provincial governments represent estimated costs paid in fiscal year 2003/2004. The expenditure figures for municipalities with independent and RCMP municipal forces represent estimated costs paid by them in calendar year 2003. *Federal and provincial government contributions are preliminary, pending a final reconciliation of RCMP municipal and provincial force contract costs.*
2. Expenditure figures for the 59 municipalities with RCMP municipal forces include both the contract costs, and those costs paid by the municipality which are over and above the contract costs. (For example, support staff salaries and benefits, and accommodation costs). These figures exclude Bylaw enforcement and victim services program costs where municipalities have this in their policing budget. The Federal government contributions to policing include their share of municipal and provincial policing costs. These figures only represent their share of the contract costs, and exclude costs borne by the Federal government which are over and above the contract costs. These figures also exclude the costs to Canada for Federal Force members operating in B.C. *Federal government contributions are preliminary, pending a final reconciliation of RCMP municipal and provincial contract costs.*
3. Canada Census occurred in 2001. The population figures contained in this report are estimates based on these Census data. The population in the *is in*. One municipality, Skeena, exceeded 5,000 population in the 2001 Canada Census and became responsible for its policing services in 2002. Skeena received a Local Government Restructure Grant for Policing totaling \$411,669 in 2003 from the provincial government. Since this move, 15,000 category. One municipality, Salmon Arm, exceeded 15,000 population in the 2001 Canada Census and moved from the 5,000 to 15,000 category to the over 15,000 category. Another municipality, Prince Rupert, moved from the over 15,000 category to the 5,000 to 15,000 category as a result of Canada Census.
4. In 2003/2004, under RCMP Policing Agreements, municipalities over 15,000 population were paying 50% of their contract policing costs, and their provincial policing costs. For the 3 First Nations Administered Police Services, the Province pays 48% and the Federal government pays 52% of the total policing costs.

APPENDIX A-3 FOOTNOTES

¹ In 2003 the strength of RCMP Division Administration decreased by four positions in the staffing and personnel areas. In 2002 the strength of RCMP Division Administration decreased by fourteen positions. Nineteen Firearms Registration positions ended and five positions were added in planning, staffing and other administration. In 2001 the strength of RCMP Division Administration increased by six positions. One position was added for overall administration, three positions were added in Human Resources, Health Services and Staff Relations, and two were added in Informatics. In 2000 the strength of RCMP Division Administration increased by five positions. Three positions were added for the BC Policing Study, one position was added for firearms registration and one position was added to the Informatics Field Support section. In 1999 the strength of RCMP Division Administration increased by three positions. In departmental administration three bargains (Appropriate Officer Representatives) were added; there was also a net increase of two positions dedicated to firearms registration. However, division administration lost two fitness and lifestyle advisory positions, canceling out the two firearms registration positions. In 1998 the strength of RCMP Division Administration was increased by eighteen positions: sixteen firearms registration positions and three other administrative positions were added to departmental administration; one position was decreased in the staffing and personnel services area. In 1997 the strength of RCMP Division Administration was decreased by eight positions in the areas of internal affairs, staffing and departmental administration. In 1996 the strength was increased by seven positions in the areas of financial services and internal investigations.

² In 2003 a total of twenty-six positions were added to Federal Criminal Law. There were six new positions for ISET (International Border Entry Integrity); three new positions for RS&ET (Integrated National Security Enforcement Teams); three new marine security positions; twelve new drug enforcement; four moving to ISET (International Border Entry Integrity) and twenty-six were added to RS&ET (Integrated National Security Enforcement Teams). In 2002 the strength of Federal Criminal Law increased by twenty-two positions. Eleven positions were added to FC Division's criminal justice section, three positions were added in federal protection intelligence support, five positions were added in the Vancouver criminal intelligence section and three positions were added in the areas of drug enforcement and weapons, and proceeds of crime enforcement. In 1998 the strength was decreased by five positions in the area of air services. In 1994 the strength was increased by three positions assigned to the proceeds of crime section.

APPENDIX A-3 FOOTNOTES CONTINUED

- ¹ In 1993 and 1994 the strength of the RCMP First Nations Policing Program increased each year by seven positions to provide Aboriginal Community Constables (ACCP) and First Nations Community Policing Services (FNCPS). The Aboriginal Community Constables were known as Indian Special Constables before 1993. In 2001 there were thirty-two ACCP and thirty-nine FNCPS positions.
- ² In 1997 the strength of International Airports was decreased by 65 positions as a result of Richmond Municipal Detachment assuming policing responsibility for Vancouver International Airport from the RCMP Federal Force. In 1994 the strength of International Airports was decreased by twelve positions — eight at Vancouver International Airport and four at Victoria International Airport. In 1992 the strength of International Airports was decreased by six positions as a result of Federal Treasury Board policy directives.
- ³ In 2002 the strength of Protective Policing was increased by forty-eight positions. Thirty-nine positions were added to Protective Operations, six positions in Technological Crime and three positions in other security units. In 2003 the strength of Protective Policing decreased by six positions. Three positions in Security Systems Education and six in Departmental Security were lost. These nine positions were offset by an increase of three in departmental services. In 1996 the strength of Protective Policing was decreased by twelve positions as a result of Treasury Board policy directives.
- ⁴ Provincial Fair smuggling unit, unprovoked homicide unit, etc. In 2003 there was an increase of twenty-five positions in this category. Six positions for legal gaming crime and criminal investigations. In 1999 there was a decrease of two positions in the Security Frauds Investigations office. In 1998 there was an increase of twelve positions, six for the auto theft task force, two in operational support and one for Suburban House Education. In 1997 there was a net increase of two positions. There were increases of twelve positions in Auto Tobacco Smuggling, two Provincial Crime, three Criminal Intelligence and six Technical Services positions, but decreases of four Telecommunications and fourteen Operational Support positions. In homicide squad, four were for Liquor Act enforcement, and most of the balance were for operational support.
- ⁵ In 1987 the RCMP restructured its eight subdivisions into four districts known as West, North, Southwest, and Southeast. Each District Headquarters or There was a decrease of thirty-three positions in operational support. These were District, Section, and Co-ordinator positions. There were increases of seven in intelligence. There was a net increase of fifty-four positions at District Headquarters. There was an increase of forty-three positions at Communications Centres and twenty positions in operational support due to restructuring of subdivisions into districts. There was an increase of four other positions in intelligence and other support services. There was a decrease of three positions in investigation and identification services at the District level. In 1988 there was a net increase of five positions assigned to subdivision Headquarters. There were increases of four positions in telecommunications, two in identification and three in dog squads, and decreases of one position in operational support and three in crime services.
- ⁶ Provincial the Province. Provincial Force Detachments are usually named after a municipality. However, if a municipality is under 5,000 population the detachment, the Provincial Force Detachment polices only the surrounding or unincorporated area. The operational functions at Provincial Force Detachments include sworn members assigned to specialized police services at the community level, i.e. forensic identification, crime prevention, victim services, and police dogs. In 1998, as a result of changes in reporting responsibility, twenty-five positions assigned to community service (specialized) functions were transferred from Provincial Force Detachments to District Headquarters.
- ⁷ In 2002 the strength for Traffic Enforcement decreased by twenty-seven positions as photo radar positions were realigned. In 1999 the strength for Traffic Enforcement was increased by two photo radar positions and decreased by one traffic services position at 12 Division. Therefore, there was a net increase of four positions in dedicated traffic enforcement. In 1998 the strength for Traffic Enforcement was increased by two photo radar positions. In 1997 there was a net increase in the strength for Traffic Enforcement of one position and decrease of one Highway Patrol and increase of two Traffic Act/Offence positions. In 1996 the strength for Traffic Enforcement was increased by four two Photo Radar and two Highway Patrol positions at detachments, but decreased by ten Traffic Act/Offence positions, and four Highway Patrol positions not reportable to detachments, for a net gain of forty positions. In 1995, Traffic Enforcement strength increased by forty-one positions as a result of the Photo Radar Project.
- ⁸ and Beauport — exceeded 5,000 population. The 1996 Canada Census indicated that the Municipality of Colwellville also over 5,000 population. Since their populations were officially over 5,000 persons, these municipalities continued to be Police Act and Municipal for municipal responsibilities for their police services. Instead of contracting for RCMP Municipal police services, it was agreed that the Provincial Force would deliver police Provincial Force police services they received. In 1992 seven of these municipalities contracted for RCMP Municipal police services. The eight municipality Police services into an RCMP Municipal service in 1998. In 1997 Police services in a provincial contracting jurisdiction status in the result. Southwestern, and 10th/11th — exceeded 5,000 population in the 1996 Census, however, until December 1998, they were not contracting for their police services in 1997. Based on results of the 2001 Canada Census.

APPENDIX A-3 FOOTNOTES CONTINUED

- ¹¹ In British Columbia a municipality under the Police Act and Municipal Act becomes responsible for its police services when the Canada Census indicates its ☐ fifty-nine municipalities which contracted with the RCMP for municipal police services.
- ¹² In 2002 there were three First Nations Administered Police Services: St'tat'imx Tribal Police; Kitasoo-Xaixais Public Safety Department, and Dididaht First Nation Public Safety and Policing Service. In 2000 the Tsewultun Police Service ceased operations, as a result their authorized strength is not included in this report. First Nation Policing Services are autonomous and independent of the RCMP.

APPENDIX A-3 DATA QUALIFIERS

1. The police strength of the RCMP is obtained from the PARADE/HRMIS Reports, and is based on the authorized strength as of December 31st of each calendar year. Authorized strength includes all sworn members and sworn civilian members. Police strength for the RCMP forces does not include non-sworn civilian support staff, bylaw enforcement officers, or RCMP Auxiliary Police.
2. The police strength as of December 31st of each calendar year. Police strength for the Independent Forces does not include non-sworn civilian support staff, bylaw enforcement officers or reserve police officers.

APPENDIX A-4 AND A-5 FOOTNOTES

¹ The following:

Canada Census results. Where jurisdictions have been amalgamated or restructured, the data shown reflect the total reporting for both the present jurisdiction.

In 1995, the Abbotsford Municipal RCMP detachment and the Matsqui Police Department were amalgamated into an Independent Municipal Force called the Abbotsford Police Department.

In 1996, as a result of Mackenzie RCMP Provincial detachment being restructured, Tsay Keh Dene RCMP Provincial detachment was opened.

In 1997, Field RCMP Provincial detachment was closed with Golden RCMP Provincial detachment assuming policing responsibilities for the area. In addition, five RCMP Municipal detachments were opened as a result of the 1996 Canada Census which showed their populations to be more than 5,000 persons: these municipalities were Spallumcheen, Lake Country, Hope, Whistler and Ladysmith.

In 1999, Radium Hot Springs RCMP Provincial detachment was closed with Columbia Valley RCMP Provincial detachment assuming policing responsibilities for the area. In 2000, as a result of Fort St. James RCMP Provincial detachment being restructured, Takla Landing RCMP Provincial detachment was opened.

In 2002, two amalgamations occurred: Rossland, Fruitvale and Trail RCMP Provincial detachments were amalgamated as Trail and Greater District RCMP Provincial detachment; and Tahsis and Gold River RCMP Provincial detachments were amalgamated as Nootka Sound RCMP Provincial detachment. In addition, one RCMP Municipal detachment was opened and one was closed as a result of the 2001 Canada Census: Sooke RCMP Municipal detachment with a population of more than 5,000 persons was opened while Port Hardy RCMP Municipal with a population of less than 5,000 persons was closed.

In 2003, one restructure and four amalgamations occurred: Fernie, Sparwood and Elkford RCMP Provincial detachments were restructured as Elk Valley RCMP Provincial detachment; Sechelt and Gibsons RCMP Provincial detachments were amalgamated as Sunshine Coast RCMP Provincial detachment; Grand Forks and Midway RCMP Provincial detachments were amalgamated as Boundary RCMP Provincial detachment; Keremeos, Oliver and Osoyoos RCMP Provincial detachments were amalgamated as South Okanagan RCMP Provincial detachment; and the Esquimalt Police Department (Independent Municipal Force) was amalgamated into the Victoria Police Department.

² Prior to 1995, data for North Vancouver provincial detachment is included in Bowen Island provincial detachment.

³ Population figures also include First Nations Reserve populations.

⁴ Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within the parks. As a result, crime rates for these jurisdictions have not been calculated.

APPENDIX A-4 AND A-5 FOOTNOTES

- ^a The three First Nations Administered Police Services — Kitasoo-Xaixais, Stl'at'imx, and Ditidaht — were opened in 1999. Each of these police services are autonomous and independent of the RCMP.
- ^b The Policing Jurisdictions CCC Offences Total does not include reporting by Canadian Pacific Railway Police, Canadian National Railway Police and other specialized units.

APPENDIX A-4 AND A-5 DATA QUALIFIERS

1. The Provincial For ☐
If a municipali
sur
2. The polic ☐
department but does not include civilian members, support staff and bylaw enforcement officers. The police strength for provincial force jurisdictions ☐
assigned to specialized functions such as highway patrol or forensic identification.
3. The offence data contained in Appendix A5 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (se ☐
rules).
4. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another usually surroune
and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owner, students and seasonal staff. If core cities expandu
considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.
5. The case burden is defined as the number of Criminal Code offences (excluding traffic offences) per authorized police strength. Because it represents the workload per officer in each policing jurisdiction, the case burden is a better indicator of the demand for police services than either population or crime rate. In Appendix A5, the total number of Criminal Code offences in 2003, and the authorized police strength as of
and RCMP municipal forces may be erroneous due to differences in the organizational structures of the RCMP and independent municipal forces. The RCMP municipal forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.

number of other factors, such as size, accessibility of the area to be policed and traffic volume are also take into consideration. Case burden and crime rate also do not reflect the amount of time spent by police providing general assistance to the public, participating in crime prevention programs, or enforcing traffic laws.

APPENDIX B FOOTNOTES

- ¹ Population figures also include First Nations Reserve populations.
- ² Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks. As a result, crime rates for these jurisdictions have not been calculated.
- ³ The three First Nations Administered Police Services -- Kitasoo-Xaixais, Stl'at'imx, and Ditidaht -- were opened in 1999. Each of these police services is autonomous and independent of the RCMP.

APPENDIX B DATA QUALIFIERS

1. The offence data contained in Appendix B have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see rules).
2. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another usually surround and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students and seasonal staff. If core cities expand considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.
3. The police department but does not include civilian members, support staff and bylaw enforcement officers. The police strength for provincial force jurisdictions is assigned to specialized functions such as highway patrol or forensic identification.
4. The British Columbia total includes additional reporting from Canadian National Railway Police, Canadian Pacific Railway Police and other specialized units.

APPENDIX C FOOTNOTES

¹ The crime data shown for 1994 include estimates for the Cities of Vancouver and Victoria. The estimates for Vancouver cover the reporting period of July to December 1994 and are based on the Vancouver Police Department's 1993 reporting under the UCR Incident-Based Survey. The estimates for Victoria cover the entire reporting year and are based on the Victoria Police Department's 1993 reporting under the UCR Survey.

The crime data shown for 1995 include estimates for the City of Vancouver. These estimates cover the reporting periods of August and October 1995 and are based on the Vancouver Police Department's "Monthly Activity Reports" for each month.

The crime data shown for 2001 include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Vancouver Police Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Port Moody Police Department's 2000 reporting under the UCR Survey.

The crime data shown for 2003 include estimates for the Cities of Victoria and Richmond. The estimates for Victoria cover the reporting period of August to December 2003 while the estimates for Richmond cover the reporting months of May and July 2003. The estimates are based on each department's 2002 reporting under the UCR Survey.

² The theft and motor vehicle theft data shown for 1995 to 2000 are based on data contained in the Vancouver Police Department's "Monthly Activity Reports" and on data provided by the Vancouver Police Department's Special Support Unit.

³ In 1995, the Vancouver Police Department (VPD) revised their reporting practices for offences in which property damage to motor vehicles occurred. Prior to 1995, these offences were reported as mischief and property damage. Subsequent to the revision in reporting practices, the VPD began reporting these offences as theft from motor vehicle offences. As a result of this change, in 1995 the number of mischief and property damage offences decreased and the number of theft from motor vehicle offences increased.

⁴ Theft offences are classified according to the value of the goods stolen. Theft offences are divided into over and under \$5,000 categories. The data shown are the total of these categories. Prior to 1995, theft offences were divided into over and under \$1,000 categories.

Mischief and property damage offences are classified according to the value of damage done to property. Mischief and property damage offences are divided into over and under \$5,000 categories. The data shown are the total of these categories. Prior to 1995, mischief and property damage offences were divided into over and under \$1,000 categories.

⁵ The incidence of prostitution offences is highly sensitive to changes in police enforcement practices and it is this factor that largely contributes to any increase or decrease in these offences.

⁶ In 1999 RCMP Commercial Crime Sections incorrectly reported counterfeit currency offences. As a result, estimates of RCMP Commercial Crime counterfeit currency data for this reporting period are included in the figures shown.

⁷ OCC: Other offences include Criminal Code offences not covered by a specific UCR offence category (e.g., breach of probation, extortion, computer/data mischief, uttering threats, criminal harassment, etc.).

⁸ In June 1997, the Controlled Drugs and Substances Act (CDSA) came into effect. The CDSA consolidates the Narcotic Control Act (NCA) and Parts III and IV, and Schedules F, G, and H of the Food and Drugs Act (FDA). Prior to the proclamation of the CDSA, drug offences were reported on O there are now four categories of drug offences: heroin, cocaine, cannabis and other CDSA drugs. Generally speaking, the other CDSA drug category contains those drugs previously included in the controlled, restricted, and other drug categories. The consolidation of illicit drugs into the new categories provided by the CDSA did not commence until mid-1997. As such, 1997 is a transition year in the reporting of drug offences. The 1997 data contain approximately half a year of data reported under the drug categories provided by the NCA/FDA and half a year of reporting under the new CDSA drug categories. Consequently, data anomalies are apparent in the other drug, controlled drug and restricted drug categories.

⁹ In December 1998, the Firearms Act came into effect. As a result, a new federal statute offence category called the Firearms Act was added to the UCR Survey. This category covered all non-Criminal Code weapons offences reported under the new legislation. As a result of the new legislation, the descriptions and contents of the UCR offence categories relating to Criminal Code weapons offences were changed. In 1999 offensive weapons data have been collected under the new categories of firearms usage, weapons possession and trafficking, and other weapons offences.

¹⁰ The incidence of offences under federal statutes (excluding drugs) and provincial statutes (excluding traffic) is highly sensitive to changes in police enforcement practices and it is this factor that largely contributes to any increase or decrease in these offences.

¹¹ The traffic data shown for 1994 and 1995 contain estimates for the City of Vancouver. The estimates for 1994 cover the last six months of 1994 and are based on the Vancouver Police Department's 1993 reporting under the UCR Incident-Based Survey. The estimates for 1995 cover the reporting periods of August and October 1995 and are based on the Vancouver Police Department's "Monthly Activity Report" for each month.

The traffic data shown for 2001 include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Vancouver Police Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Port Moody Police Department's 2000 reporting under the UCR Survey.

The traffic data shown for 2003 include estimates for the Cities of Victoria and Richmond. The estimates for Victoria cover the reporting period of August to December 2003 while the estimates for Richmond cover the reporting months of May and July 2003. The estimates are based on each department's 2002 reporting under the UCR Survey.

APPENDIX C DATA QUALIFIERS

1. The offence, clearance, and persons charged data contained in Appendices C1 to C7 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey traffic scoring rules. If a single criminal traffic incident contains a number of violations of the law, only the most serious one is recorded for UCR purposes (MSO Rule). The only exception to the MSO Rule is in incidents where an offender is charged with impaired operation and failure to provide either a breath or blood sample. In this situation both offences would be scored and cleared by charge, but only the more serious offence of impaired operation would reflect persons charged data.
2. The offence data contained in Appendix C8 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey traffic scoring rules. If a single criminal traffic incident contains a number of violations of the law, only the most serious one is recorded for UCR purposes (MSO Rule). The only exception to the MSO Rule is in incidents where an offender is charged with impaired operation and failure to provide either a breath or blood sample. In this situation both offences would be scored and cleared by charge, but only the more serious offence of impaired operation would reflect persons charged data.
3. The number of traffic offences represents only those traffic offences reported to or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted. These data do not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained. Parking violations or those traffic violations normally dealt with through ticket procedures, i.e., violation tickets (VTs), are not included in any of the offence categories contained in Appendix C8.
4. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census.
5. The number of offences cleared represents the number of offences solved by the police. Offences are cleared by charge when the police file a Report to Crown counsel (RCC) recommending charges. This does not necessarily imply the swearing of an information or prosecution as Crown may return the case to police due to insufficient evidence or take no further action. Offences are cleared otherwise when the police have identified an offender and have enough evidence to support a charge, but do not recommend charges. Offences are cleared otherwise in specific situations, such as, the offender was under 12 years of age, the victim was uncooperative, the offender had diplomatic immunity, or the offender was previously sentenced for similar crimes. ***It should be noted that in 2000, the RCMP implemented PIRS reporting changes governing the clearance of an offence by other means. These changes stipulated that records could no longer be validated and cleared by other means without police inputting a suspect's name and date of birth. As a result, from 2000 onward, the number and rate of offences cleared, and those cleared by other means has decreased.***
6. The clearance rate is defined as the number of offences solved by police as a percentage of the number of offences reported by police. Caution should be used in the interpretation of clearance rates because the number of offences reported and the number of offences cleared within the same calendar year are not necessarily linked. Offences may be cleared or considered solved many months or even years after they are reported to police. Consequently, within the same reporting year, it is possible that the number of cleared offences exceeds the actual number of offences, resulting in clearance rates of over 100%.
7. The number of persons charged represents the number of people for whom the police have filed a Report to Crown counsel (RCC) alleging responsibility for an offence. An RCC does not necessarily imply the swearing of an information, or the prosecution or conviction of an individual as the Crown may return the case to police due to insufficient evidence, take no further action, approve diversion or alternative measures, or in the case of young offenders (youths), issue a letter of caution. Under the provisions of the Young Offenders Act, a young offender is defined as any individual under 18 years and over 11 years of age.

APPENDIX D FOOTNOTES

¹ The following:

Canada Census results. Where jurisdictions have been amalgamated or restructured, the data shown reflect the total reporting for both the present jurisdiction.

In 1995, the Abbotsford Municipal RCMP detachment and the Matsqui Police Department were amalgamated into an Independent Municipal Force called the Abbotsford Police Department.

In 1996, as a result of Mackenzie RCMP Provincial detachment being restructured, Tsay Keh Dene RCMP Provincial detachment was opened.

In 1997, Field RCMP Provincial detachment was closed with Golden RCMP Provincial detachment assuming policing responsibilities for the area. In addition, five RCMP Municipal detachments were opened as a result of the 1996 Canada Census which showed their populations to be more than 5,000 persons: these municipalities were Spallumcheen, Lake Country, Hope, Whistler and Ladysmith.

In 1999, Radium Hot Springs RCMP Provincial detachment was closed with Columbia Valley RCMP Provincial detachment assuming policing responsibilities for the area. In 2000, as a result of Fort St. James RCMP Provincial detachment being restructured, Takla Landing RCMP Provincial detachment was opened.

In 2002, two amalgamations occurred: Rossland, Fruitvale and Trail RCMP Provincial detachments were amalgamated as Trail and Greater District RCMP Provincial detachment; and Tahsis and Gold River RCMP Provincial detachments were amalgamated as Nootka Sound RCMP Provincial detachment. In addition, one RCMP Municipal detachment was opened and one was closed as a result of the 2001 Canada Census: Sooke RCMP Municipal detachment with a population of more than 5,000 persons was opened while Port Hardy RCMP Municipal with a population of less than 5,000 persons was closed.

In 2003, one restructure and four amalgamations occurred: Fernie, Sparwood and Elkford RCMP Provincial detachments were restructured as Elk Valley RCMP Provincial detachment; Sechelt and Gibsons RCMP Provincial detachments were amalgamated as Sunshine Coast RCMP Provincial detachment; Grand Forks and Midway RCMP Provincial detachments were amalgamated as Boundary RCMP Provincial detachment; Keremeos, Oliver and Osoyoos RCMP Provincial detachments were amalgamated as South Okanagan RCMP Provincial detachment; and the Esquimalt Police Department (Independent Municipal Force) was amalgamated into the Victoria Police Department.

² The crime data shown for 1994 includes estimates for the Cities of Vancouver and Victoria. The estimates for Vancouver cover the reporting period of July to December 1994 and are based on the Vancouver Police Department's 1993 reporting under the UCR Incident-Based Survey. The estimates for Victoria cover the entire reporting year and are based on the Victoria Police Department's 1993 reporting under the UCR Survey.

The crime data shown for 1995 include estimates for the City of Vancouver. The estimates cover the reporting periods of August and October 1995 and are based on the Vancouver Police Department's "Monthly Activity Reports" for each month.

In 2000 and 2001, as a result of E-Comm labour action, there were decreases in the number of crimes reporting to the Vancouver Police Department. The labour action which began in September 2000 and ended in September 2001 affected the number of offences, e.g., theft, assault and robbery, reported for each year.

The crime data shown for 2001 include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Vancouver Police Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Port Moody Police Department's 2000 reporting under the UCR Survey.

The crime data shown for 2003 include estimates for the Cities of Victoria and Richmond. The estimates for Victoria cover the reporting period of August to December 2003, while the estimates for Richmond cover the reporting months of May and July 2003. The estimates are based on each department's 2002 reporting under the UCR Survey.

³ Prior to 1995, data for North Vancouver provincial detachment is included in Bowen Island provincial detachment.

⁴ Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks. As a result, crime rates for these jurisdictions have not been calculated.

⁵ Population figures also include First Nations Reserve populations.

⁶ The three First Nations Administered Police Services -- Kitasoo-Xaisxais, St'at'imx, and Ditidaht -- were opened in mid-1999. As a result, 1999 was a

APPENDIX D DATA QUALIFIERS

¹ The offence data contained in Appendices D1 to D13 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey criteria (for a full explanation of these rules).

APPENDIX D DATA QUALIFIERS CONTINUED

2. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are based on the results of Canada Census, which is conducted every five years. Canada Census occurred in 1996 and 2001; population figures for intervening years are estimates based on Census data. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-a" and seasonal staff-populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.
3. The number of sexual offences includes level 1 sexual assault (least amount of bodily harm), level 2 sexual assault (involving bodily harm/weapon), level 3 sexual assault (aggravated), and other sexual offences including sexual interference, invitation to sexual touching, sexual exploitation and incest.
4. The number of level 3 assault (aggravated), unlawful bodily harm, shoot with intent, assault police, assault other officer and other assaults including poisoning and torture.
5. The number of break and enter offences includes break and enter (business premises), break and enter (residence), and other break and enter offences including breaking into trains, box-cars, unattached trailers and storage lockers.
6. The number of vehicles, and self-propelled farming and construction implements.
7. The number of thefts includes bicycle theft, theft from motor vehicle, shoplifting and other theft. Thefts are divided into over and under \$5,000 categories. Prior to 1995, theft offences were divided into over and under \$1,000 categories.
8. The number of mischief and property damage offences (vandalism) includes mischief and property damage over \$5,000, and mischief and property damage under \$5,000. Prior to 1995 mischief and property damage offences were divided into over and under \$1,000 categories.
9. The B.C. total includes additional reporting from Canadian National Railway Police, Canadian Pacific Railway Police and other specialized units.

FOOTNOTE

¹ Federal drug offence categories cover drugs, salts and derivatives of substances described by the SCHEDULES attached to the Controlled Drugs and Substances Act, which replaced the Narcotic Control Act and Sections III and IV of the Food and Drugs Act on May 14, 1997.
